2012 - The Year in Review

Police Chief
Colonel Philip A. Broadfoot

Crime

The 2012 highlights of the Danville Police Department were the slight reduction in crime rates, continued use of directed patrol techniques, major changes for our information management systems and enhancements of our equipment. We thank the citizens of Danville for their support because without their information and cooperation we could not do our job.

Crime Continues to Trend Down

Data on crimes reported in 2012 show reductions in felony violent crime. Most significant is that there were only three homicides last year, down from eight the previous year and the lowest since 1990. While there were also reductions in the other major crime categories of burglary and motor vehicle theft, there were increases in reported larceny and arson. The overall total of these reported offenses went down from 2,207 in the previous year to 2,103 in 2012.

Directed Patrol Techniques

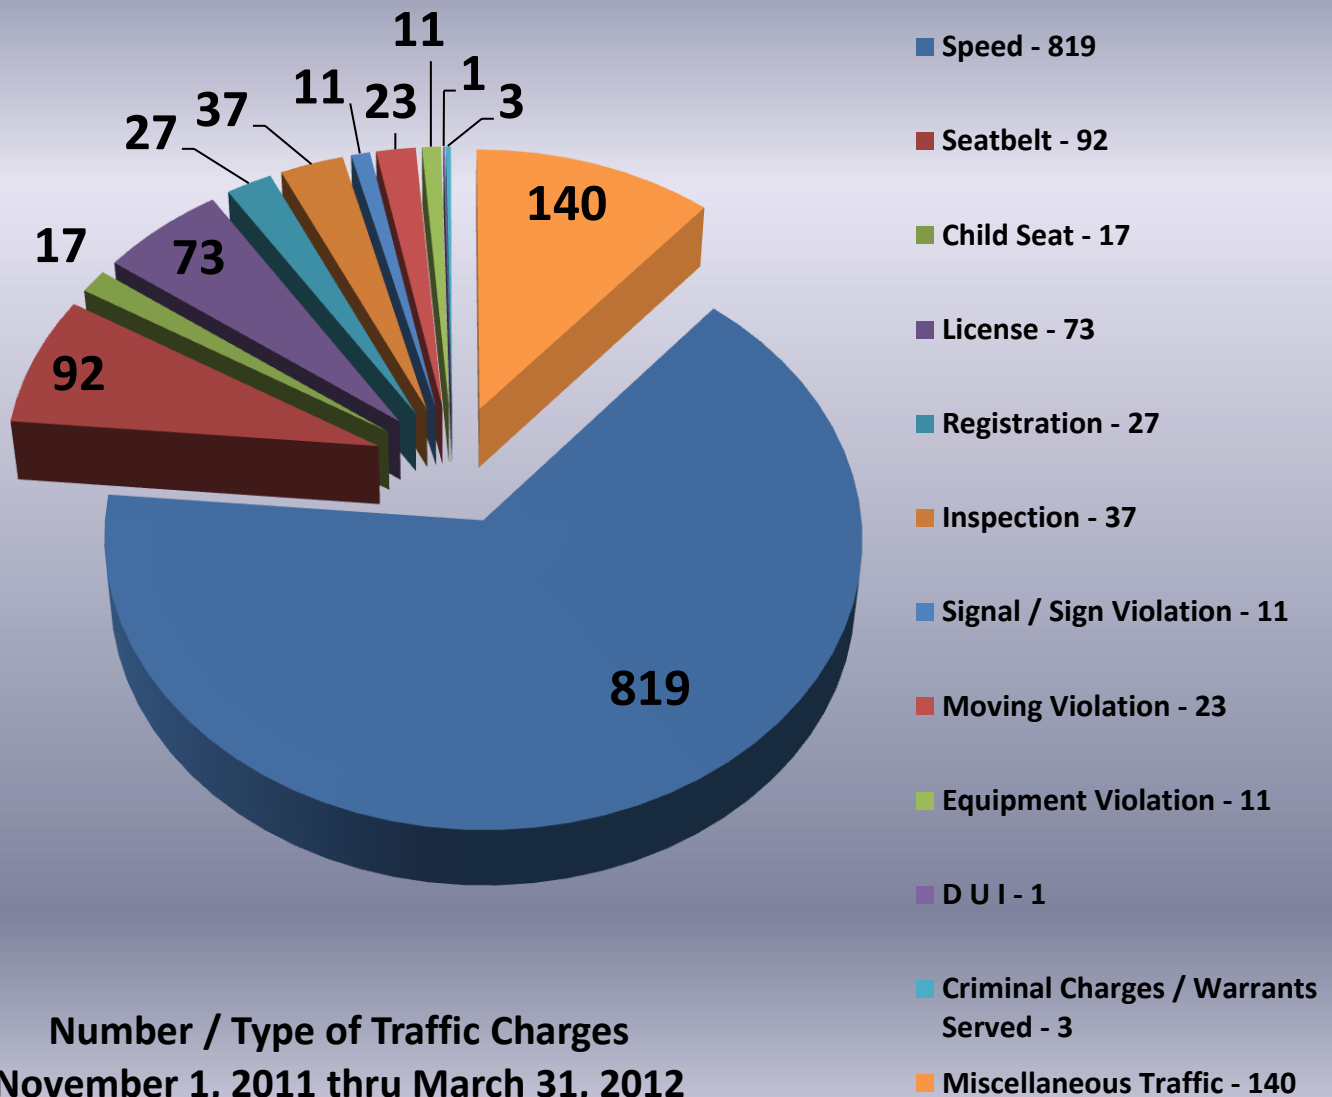

Traffic Enforcement Unit

Plans to deal with such issues as speeding and other traffic violations in complaint prone areas throughout the city led to the creation of a *four-member Traffic Enforcement Unit (TEU)* at the beginning of November 2011. The unit directed its focus on enforcement in high-traffic areas such as school zones and major intersections. The officers also covered roadways in Danville where residents had complained of speeding, traffic light violations and other traffic concerns. In 2011, Danville ranked 12th out of 39 independent Virginia cities for the number of car crashes per capita. In 2010 Danville reported 1,118 crashes, 1,116 in 2009 and 1,192 in 2008. Prior to that, the worst years for crashes over the past decade were 2004 with 1,997 and 2003, which saw 2,271 crashes. In the 2011 Annual Report we were only able to report on two months of the TEU's statistics. The unit operated for a period of five months. The following page will provide a complete overview of the number of citations issued and their breakdown by type for the entire TEU deployment period.

Directed Patrol Techniques

Traffic Enforcement Unit

Directed Patrol Techniques

Community Police Street Crimes Unit

The highly visible officers of the Patrol Division and the detectives assigned to investigate major crimes are the front lines of public safety services to our community when it comes to the prevention and investigation of crimes and the apprehension of those responsible. Even with a population drop over the past few years, calls for service have remained constant as the public's expectations of police services increases. The end result forces the patrol officer into permanent response mode, leaving precious little time for proactive policing.

In 2012, the Street Crimes Unit became the main function of Danville Police Department's Community Police section. First put into service as a temporary unit in late 2010 and working through most of 2011, the Street Crimes Unit's mission was to focus intense, proactive patrols within a small geographic area of the City with a disproportionately high level of violent crime. The success of this technique in that particular area allowed the unit to expand to other areas in the City that were experiencing high amounts of criminal activity.

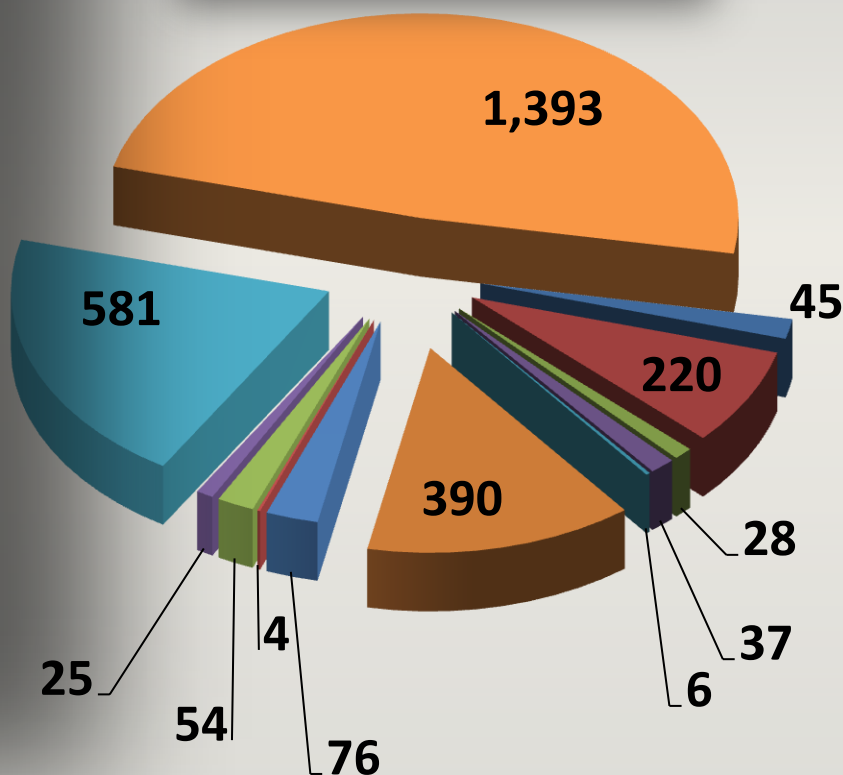

Utilizing many of the same supervisors and officers, the Community Police section was reorganized to function primarily as a Street Crimes Unit. The Community Police section's new role builds on the success of the smaller unit, allowing for continued and enhanced support of this successful patrol technique.

The newly restructured Street Crimes Unit began operation in April of 2012. The following graph depicts a breakdown of their efforts for the balance of 2012⁸

Directed Patrol Techniques

Community Police Street Crimes Unit

- Domestic A & B - 45
- Alcohol Violations + Drunk in Public - 220
- Assault & Battery - 28
- Weapons Violations - 37
- Burglary - 6
- Drugs / Narcotics - 390
- DUI - 76
- Robbery - 4
- Trespassing - 54
- Warrant Service for Other Agency - 25
- All Other Criminal Offenses - 581
- Traffic Citations - 1,393

Grants for 2012

- **Speed Selective Enforcement Grant**: **\$14,376**; Virginia DMV pass through from the U.S. Department of Transportation National Highway Traffic Safety Office, selective enforcement pay and equipment purchase
- **Occupant Protection Selective Enforcement Grant**: **\$2,520**; Virginia DMV pass through from the U.S. Department of Transportation National Highway Traffic Safety Office, selective enforcement pay
- **Alcohol Selective Enforcement Grant**: **\$7,200**; Virginia DMV pass through from the U.S. Department of Transportation National Highway Traffic Safety Office, selective enforcement pay
- **Regional Crash Team Grant**: **\$19,500**; Virginia DMV pass through from the U.S. Department of Transportation National Highway Traffic Safety Office, training and equipment purchase
- **Regional Occupant Protection Selective Enforcement Grant**: **\$6,000**; Virginia DMV pass through from the U.S. Department of Transportation National Highway Traffic Safety Office, selective enforcement pay
- **Justice Assistance Grant (JAG)**: **\$26,028**; U.S. Department of Justice, purchase officer-worn audio/video cameras

2012 - The Year in Review

Implementation of Law Enforcement Technology & Equipment

Body-Worn Audio/Video Systems

In 2011 the Danville Police Department's first deployment of professional grade body-worn audio/video camera recording systems was a great success. These systems provide officer point-of-view documentation of interactions with individuals that result in numerous positive benefits. Primarily, the cameras provide a window into the often nuanced and dynamic situations that police officers encounter on the street. The behavior of suspects along with their verbal and non-verbal cues provides incontrovertible evidence in court.

For the officers, the presence of the cameras serves to reinforce professionalism and protect them from unfounded complaints. Similar to our experience with in-car camera systems, they overwhelmingly provide objective support of proper action on the part of the officer. There have been numerous incidents in which persons initially intent on making a complaint about an officer's actions decide to drop the matter once they learn the event was recorded. This past year we were able to add eight units to the original ten units deployed in 2011. This has allowed each member of the Street Crimes Unit, the primary users of the camera, to be outfitted with a separate system. The unit's frequent contacts with individuals in high crime areas allow the camera to be used to their fullest potential. This initiative was grant funded.

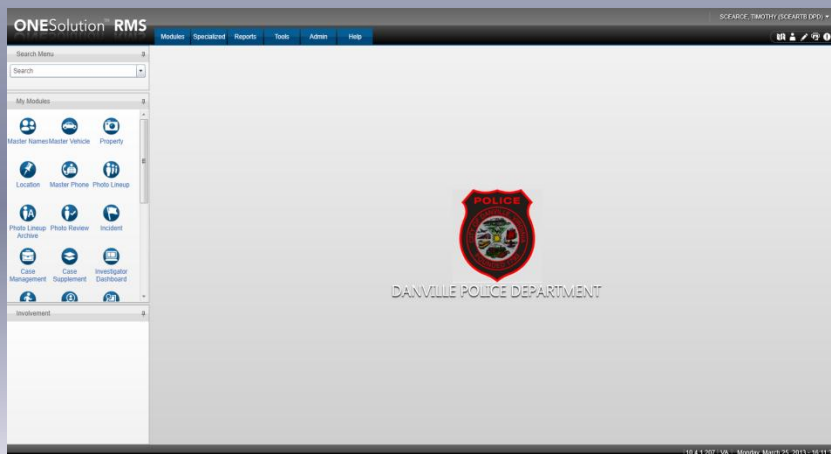

2012 - The Year in Review

Public Safety Systems Upgrade

This past year brought major changes to the information management systems of the Police Department, Adult Detention, Danville Sheriff's Office and the Danville Fire Department Emergency Communications Center. A process that was a year in the making led to a new Computer-Aided Dispatch (CAD) software system in the Emergency Communications Center (ECC), Mobile Computer Terminal (MCT) and Mobile Field Reporting (MFR) software for officers in the field, Records Management System (RMS) for the Police Department, and Jails Management Systems (JMS) for Adult Detention and Danville Sheriff's Office. In a highly collaborative effort, these departments worked closely with the City of Danville Information Technology Department to plan, setup and implement these heavily integrated systems. The new CAD system went live first in August followed by MFR, RMS and JMS in mid-November.

The CAD system is used by 911 Telecommunicators to receive, process, and route calls for service requests for police, fire and emergency medical services.

The MCT system is the mobile interface with CAD for officers in the field. Through laptop computers and other communications equipment in the vehicle, officers receive detailed information on calls for service that originate from the ECC. Through this same system, officers have the ability to query local, regional, state and national criminal justice information systems for wanted persons, vehicle and stolen property and to check driver's licenses and vehicle registration information.

2012 - The Year in Review

The MFR software is the mobile component of the RMS. Almost all the documentation that officers perform is completed in this mobile system, such as reports on incidents, arrests, crashes, field contacts and supplemental follow-ups. These reports are then submitted electronically for supervisor review and then transferred into the RMS following approval. The coming year will see the implementation of an electronic summons component of the MFR. Officers will use the software to generate summonses for traffic infractions and certain criminal offenses and then print copies in their vehicle for the violator and courts. The RMS is the central information management system for the Police Department. From all the reports mentioned above as well as numerous others, the RMS is used to organize and store the collected data for submission to various state and federal agencies. For example, information on reported offenses and arrests are reported monthly to the Virginia State Police for further submission to FBI Uniform Crime Reporting (UCR).

The JMS is the central information management system for Adult Detention and Danville City Jail. These systems are used to intake, document, and manage information on individuals held in custody in their respective facilities. The coming year will bring the implementation and use of new components of the RMS, including a Police 2 Citizen (P2C) web-based citizen access point for crash reports, recent arrests and public versions of most incident reports. As new data is entered into the RMS, we will be able to make use of crime analysis products that are integrated in the software and will no longer have to export data into other programs. This initiative was funded with a planned capital improvement project and grant funding.

2012 - The Year in Review

Service Weapon Replacement

The Police Department underwent a complete replacement of our main service weapons. All sworn police personnel had their 10-year-old department issued Glock Model 22 .40 caliber handguns replaced with new Gen4 versions of the same weapon. Though our old weapons were well maintained and in very good condition, they had reached an age that would have necessitated the recommended replacement of numerous internal components. In addition, the tritium-based night sights on the weapons had reached end of service life and no longer illuminated sufficiently. Their good condition and strong trade-in value along with competitive bidding allowed the department to purchase new, improved versions of the same weapon at a price that was on par with the cost of needed maintenance on the decade-old weapons. The upgrade was even more significant for Adult Detention, since they transitioned from six-shot revolvers to the high capacity semi-automatic Glock. This initiative was funded with a planned capital improvement project.

Glock Model 22 .40 Gen4

2012 Homicide Re-Cap

April 03, 2012

On April 3, 2012 officers responded to 149 Levelton Street to assist the Danville Fire Department with a medical emergency involving a three year old female child. The child had been transported to Danville Regional Medical Center after allegedly passing out during a “shadow boxing match” with her mother’s live-in boyfriend, Shonta Barnhill-Sherrod. He was initially charged with Child Abuse and Neglect and booked into the Danville City Jail the day of the incident. Over the next several weeks and after long arduous hours of investigative follow up, it was determined that Barnhill-Sherrod had become angry with the child and had actually kicked and stomped her during a fit of anger. The case was presented to a Grand Jury and an indictment for First Degree Murder was issued. This case was heard in Danville Circuit Court where Barnhill-Sherrod plead guilty to the charges and received a twenty-five year sentence for his crime.

2012 Homicide Re-Cap

June 23, 2013

On June 23, 2012 officers responded to Highlanders Restaurant in reference to a shooting. Once on scene it was determined that there were two victims. One, a female had suffered a gunshot wound to her right hand, while the second, a male had suffered a gunshot wound to his chest. The female, a restaurant employee, advised officers that she was attempting to break up a disturbance outside the restaurant when she heard a gunshot and saw people running away from the area. Woods realized afterwards that she had been shot in the hand during the incident. Both victims were transported to Danville Regional Medical Center for treatment with Woods being released later for non-life threatening injuries. Later in the morning, the male victim was pronounced dead from the injuries sustained from the gunshot wounds. Further investigation revealed that Larry Jacoby Davis was the shooter. Davis was charged with Possession of a Concealed Weapon at the time of the incident. On June 25, 2012 evidence was presented to a Grand jury and five indictments were issued. Davis was charged with First Degree Murder, use of a Firearm in the Commission of a Felony (2 counts), Malicious Wounding and Discharge a Firearm within 1,000 feet of a school.

The case was heard in Danville Circuit Court where Davis plead guilty to all charges. A sentencing hearing was conducted on March 8, 2013 and Davis was sentenced to the following:

- Second Degree Murder – Serve 20 years, 18 months' probation, good behavior for life
- Use Firearm in Commission of Felony – Serve 5 years
- Malicious Wounding – Serve 3 years
- Use Firearm in Commission of Felony – Serve 3 years
- Discharge Firearm w/in 1000 feet of School – Serve 1 year

2012 Homicide Re-Cap

September 28, 2012

On September 28, 2012 officers responded to the area of Claiborne Street in reference to shots fired. Subsequent investigation led officers to 238 First Street where they found a male subject inside a vehicle suffering from a gunshot wound to his chest. The male victim, later identified as Merrill Miquell Baker, died as a result of his injuries. Numerous man-hours continue to be logged on this case as the investigation continues. This case is currently Open and Active.

Homicide / Cold Case Profile

Homicide

On August 5, 2011, at approximately 3:17 a.m., Dispatch received a call in reference to a body in the grassy area on the side of the road on Kirk Drive, two-tenths of a mile north of Seminole Trail. The victim, later identified as Thomas Wilson, had been struck by a vehicle. This Hit and Run case remains under investigation at this time.

Homicide

On November 6, 2011, at approximately 6:48 p.m. officers responded to reports of shots fired on Edmonds Street. A male victim, later identified as Cordero L. Walker, was found lying on the ground beside 615 Edmonds Street suffering from multiple gunshot wounds. This murder case remains under investigation at this time.

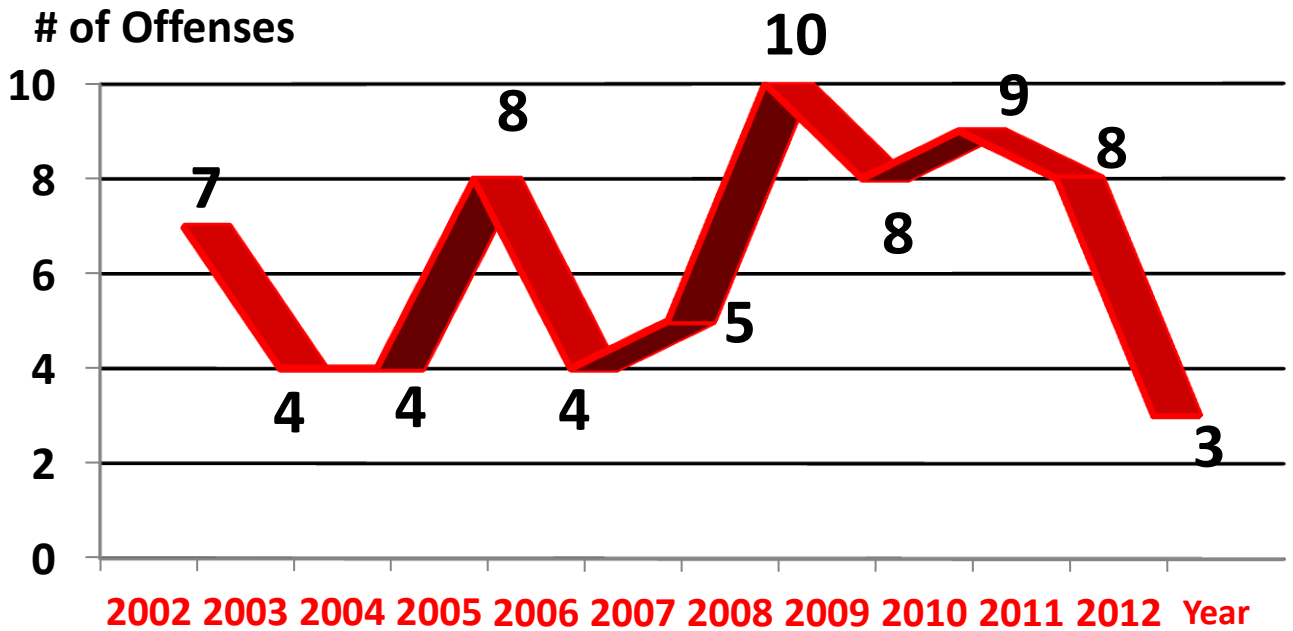

Ten Year Calls for Service

NOTE: Due to the implementation of a new Records Management System (RMS), certain previously defined calls for service were either deleted or blended into the new format. Additionally, Computer Aided Dispatch protocol prompts the telecommunications staff with a series of questions and answers so the end result for the call (CFS) is dependent upon the data input.

Ten Year Warrant Trend

The Danville Police Department handles warrants in many ways during the course of any given year. Officers obtain warrants for crimes they are assigned to investigate. Officers serve warrants obtained by other parties such as private citizens or other law enforcement agencies. The warrant serves as a multi-purposed tool that engages both officers and citizens into the arena of the courtroom. The management of these documents falls to the Police Records Division. Once a warrant is obtained, it is entered in to the Records Management System(RMS) and is tracked from entry to service. Warrants are also entered into the state and/or national wanted persons data base. Our warrant totals generally average in the thousands and range in subject matter from unpaid parking tickets to homicide. The graph below depicts a ten year trend in warrants handled by the Danville Police Department.

Ten Year Parking Ticket Trend

of Tickets Issued

Due to a resignation, the Danville Police Department did not have a Parking Enforcement Attendant employed for the greater portion of 2011

American Legion Post 1097 Police Officer of the Year: Cpl. T. B. Searce

In Tribute

11-08-2012 – It is with sadness that we announce the passing of Officer Chris W. Doyle this morning at his home in Eden NC. Chris, who was only 34 years of age, died of complications from an aggressive colon cancer which was initially discovered in April of this year but did not respond to treatment. Chris was still assigned to Crime Scene at the time of his death and was affectionately nicknamed "Droopy". He is survived by his wife, an eight year old daughter, and a six month old son.

A Glimpse Into The Future

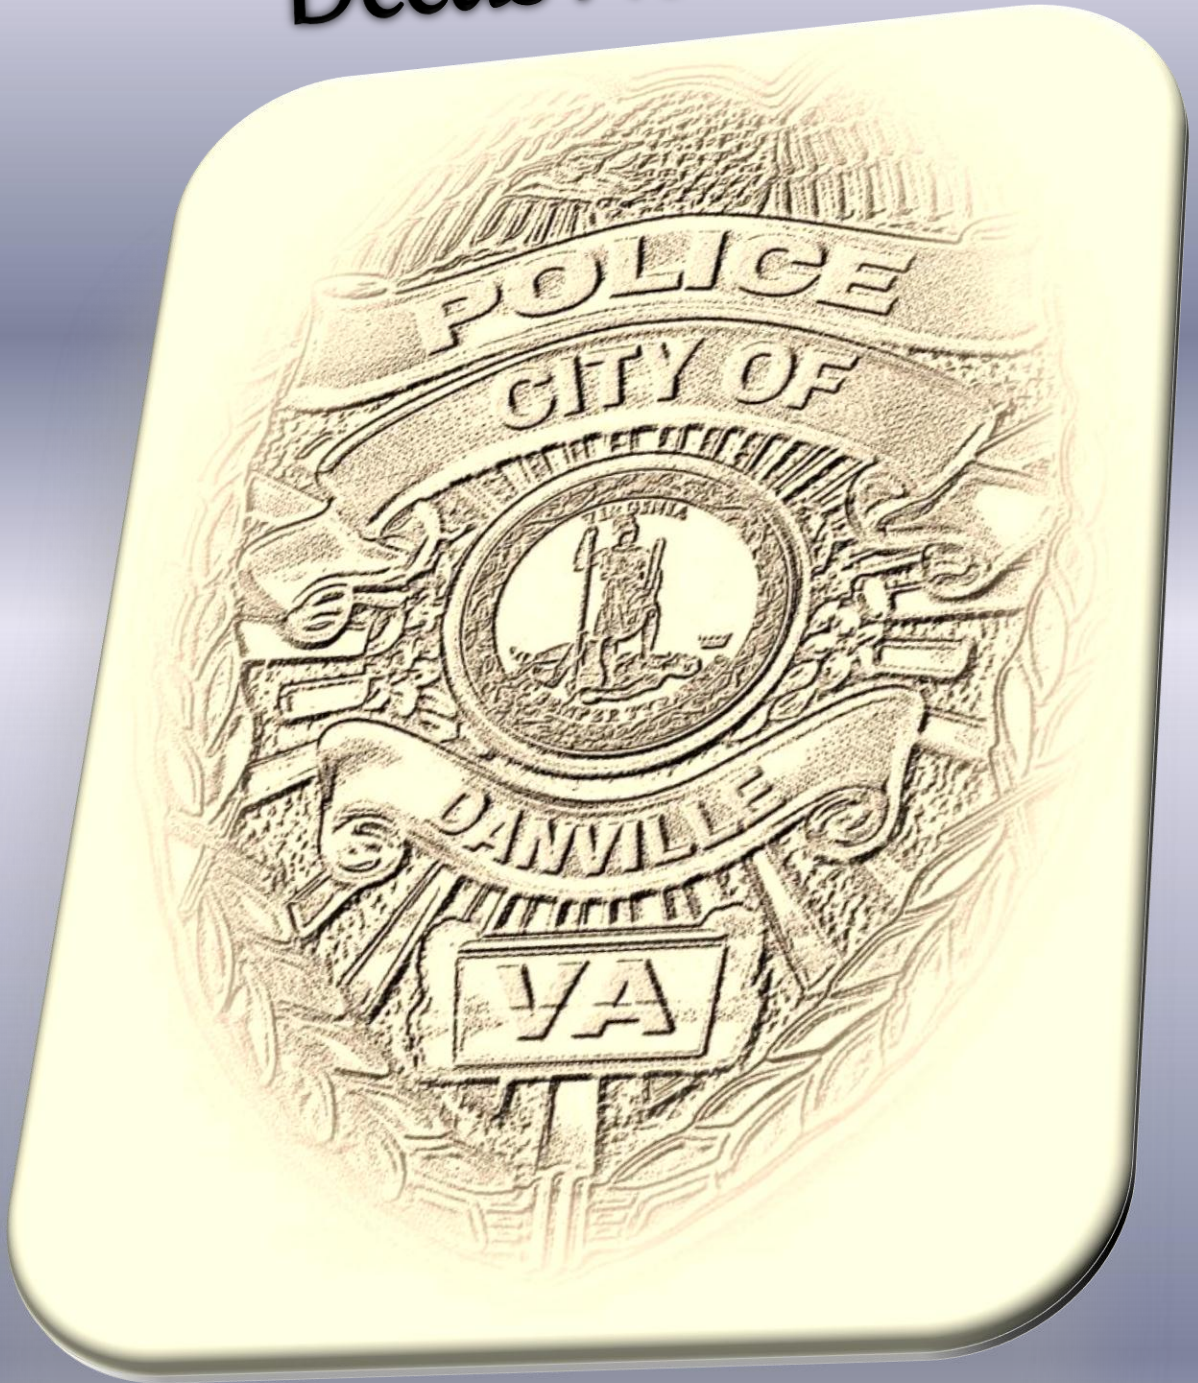

Police agencies that continue to seek out and implement emerging and innovative technology are better enabled to serve their community by bringing these resources to bear on crime. The technology and equipment upgrades made possible during 2012 were in large part the result of grant funding and would not otherwise have been financially possible to undertake. Grants received last year will continue to make improvements possible in the coming year.

We are planning the replacement of the audio / video recording system in the Department's interview / interrogation room. We are looking for a system that not only produces excellent audio / video recording of interviews and interrogations but also provides for the efficient storage and management of the recordings themselves.

The tasks of prevention, investigation, apprehension and record retention will always be with us. The ability to harness and manage the technology of the future to accomplish these tasks will be a defining aspect of the measure of our success. The City of Danville Police Department acknowledges our heritage and enthusiastically embraces our future as we continue to serve the Dan River Region.

The men and women of the Danville Police Department are proud to serve the citizens of the region and look forward to their continued support during 2013.

“Deeds Not Words”

Since 1793
