5

I am pleased to present the Danville Police Department 2014 Annual Report. In this report you will find descriptive information, statistical data and photographs depicting the work performed by the officers of the department.

The year 2014 was filled with achievements and challenges alike as the department navigated the changing public perspective on law enforcement and re-evaluated our strategies for transparent public service. The addition of body worn cameras for all of our Operations Division, along with multi-layered training programs for staff and a continued concerted effort to enhance our hiring process has left the department on a firm strategic platform for the new year ahead.

You can be proud of your police department. The men and women that make up the Danville Police Department consistently perform at levels far and above the "norm" and do their best to provide quality service to the citizens of Danville. We are proud to serve the citizens of the region and look forward to their continued support during 2015.

Sincerely,

Colonel Philip A Broadfoot
Chief of Police

Danville Police Department 2014: Year in Review

The 2014 highlights of the Danville Police Department were:
- ➢ the slight reduction in crime rates;
- ➢ expansion of directed patrol techniques;
- ➢ enhancement and upgrades to our information systems and equipment.

Crime Continues to Trend Down

Preliminary figures on crime reported in 2014 show reductions in most of Danville's serious crime. Most significant is that there were only three homicides last year, down from six the previous year. There were also reductions in the other major crime categories of burglary, larceny, motor vehicle theft and arson. Reported robberies were down by one from the previous year however there were increases in reported aggravated assaults and rapes. The overall total of these reported offenses were down from 2,204 in the previous year to 1,954 in 2014.

2014 Calls for Service

EMS — 9639
FIRE — 7253
LAW — 60009
OTHR — 2
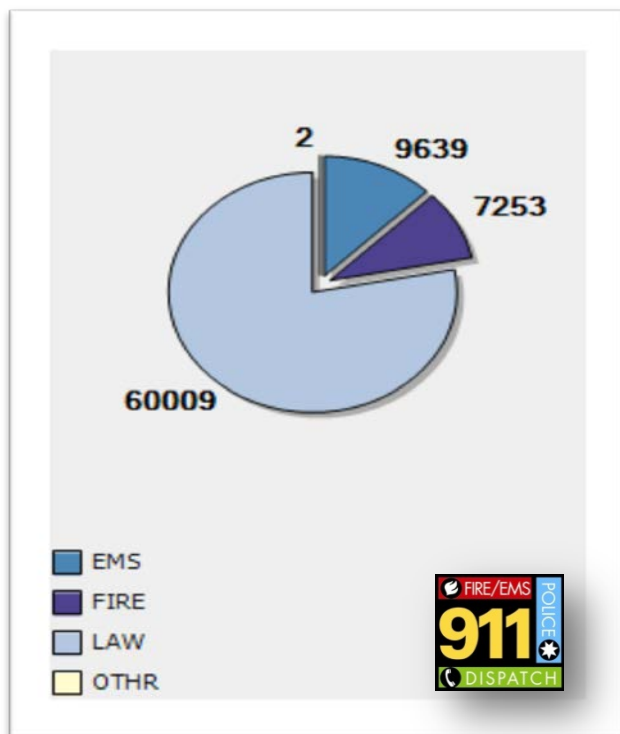

Calls for Service by Weekday

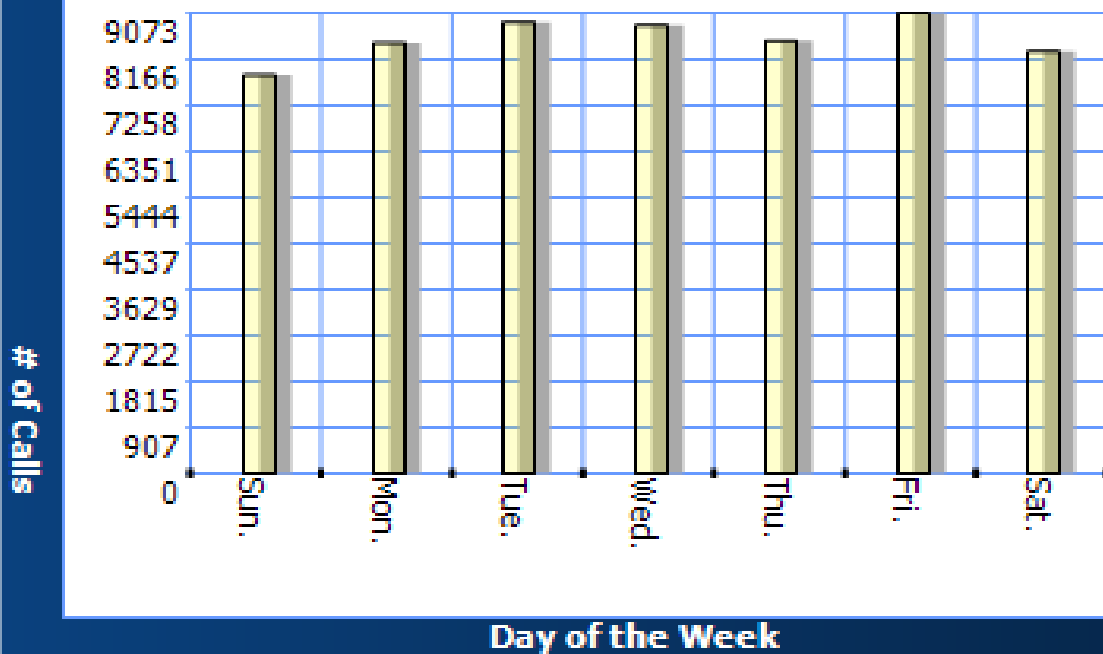

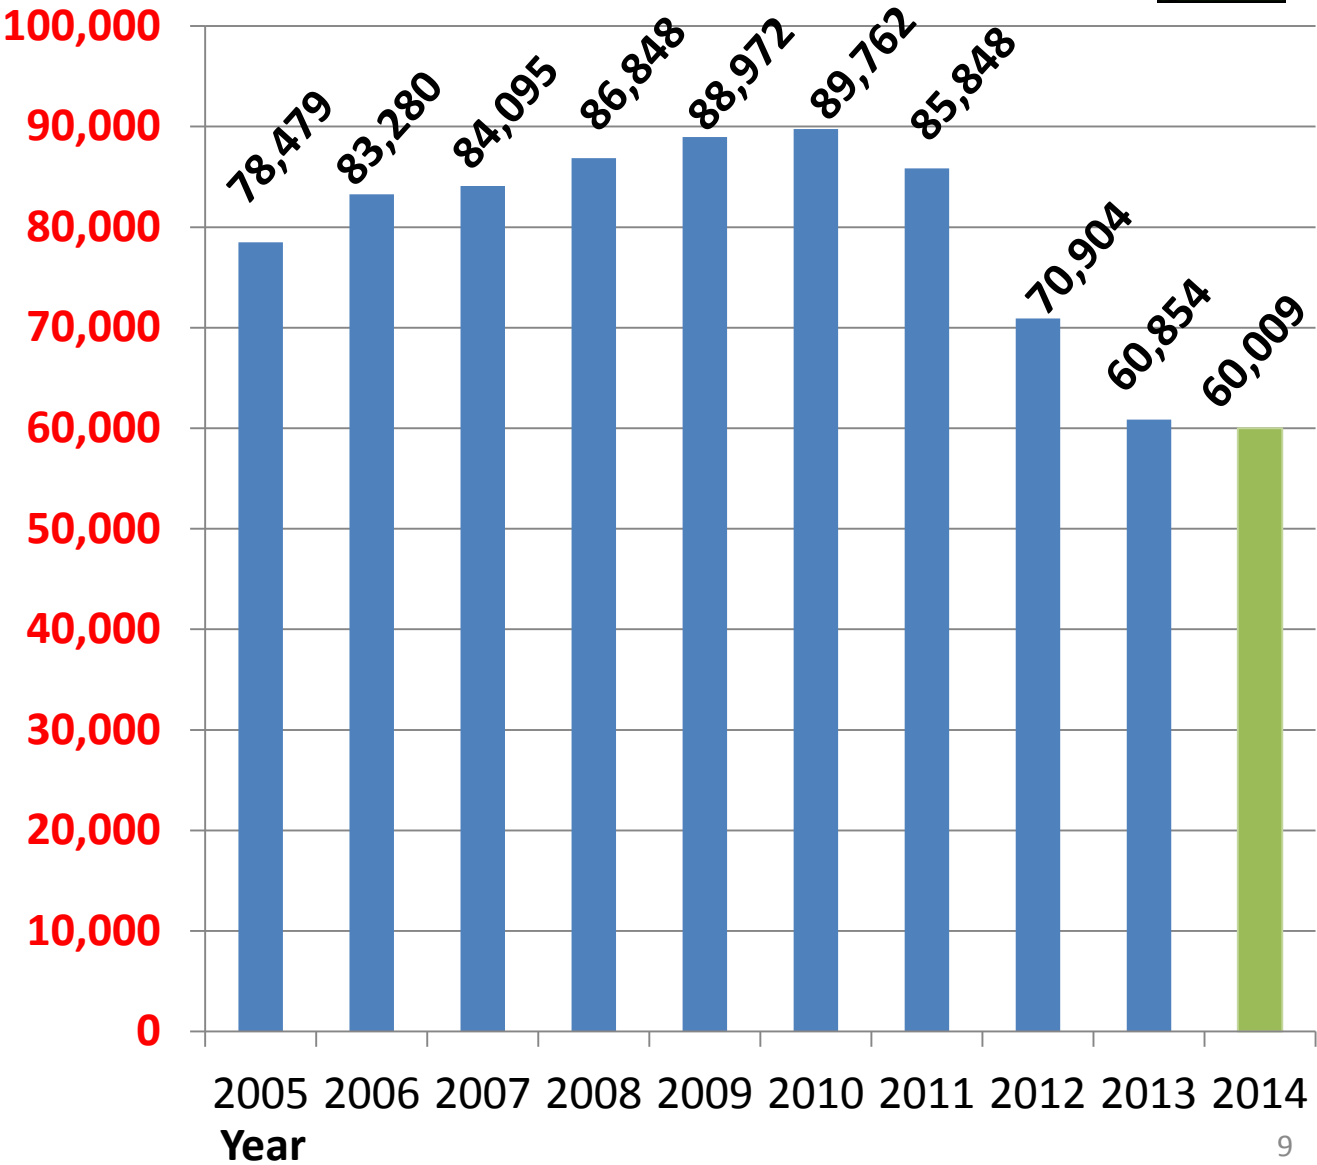

# of Calls

Day of the Week

NOTE: Due to the implementation of a new Records Management System (RMS) in late 2012, certain previously defined calls for service were either deleted or blended into the new format. Additionally, Computer Aided Dispatch protocol prompts the telecommunications staff with a series of questions and answers so the end result for the call (CFS) is dependent upon the data input.

# of Calls

2014 Crime Index of Offenses

In 2014 report rates were calculated using the population estimates from the Weldon Cooper database, dated 02-11-2015.
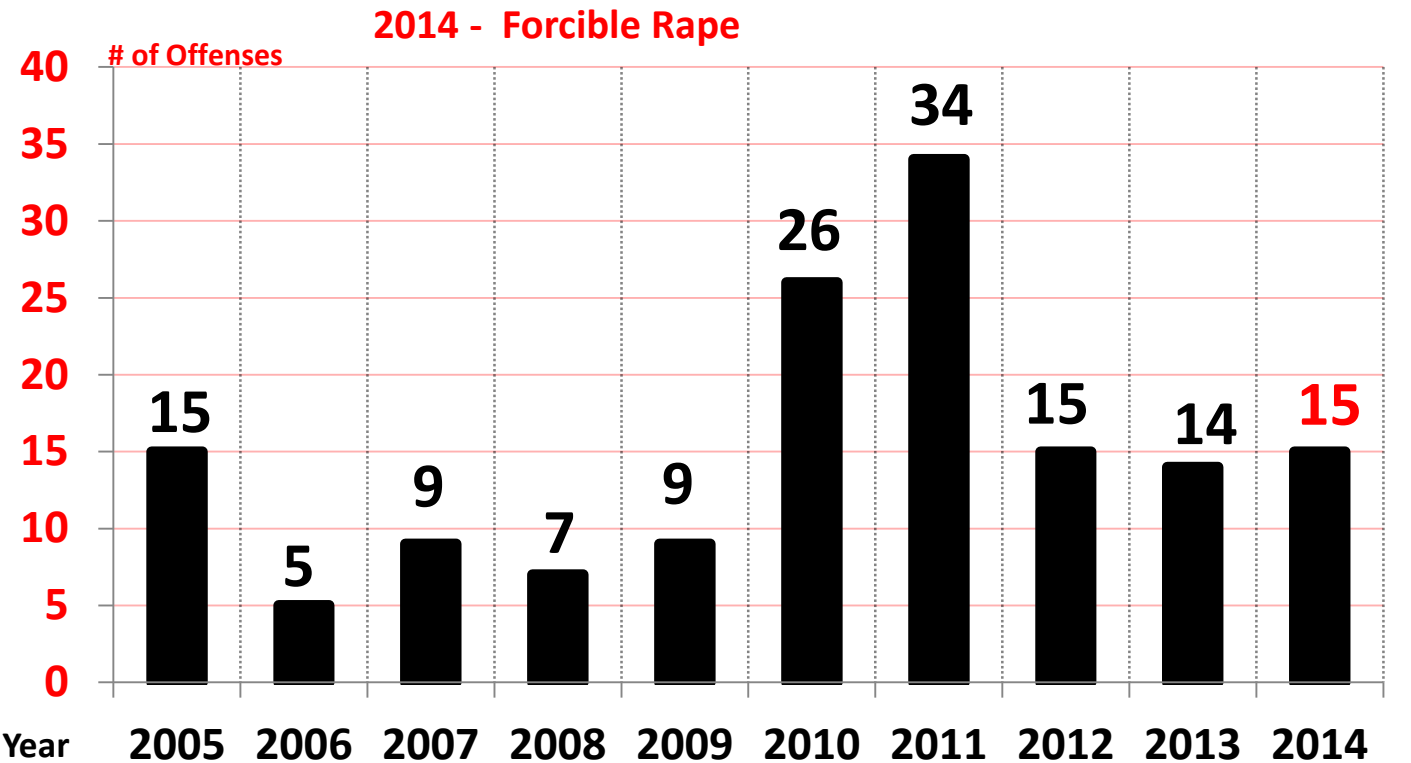

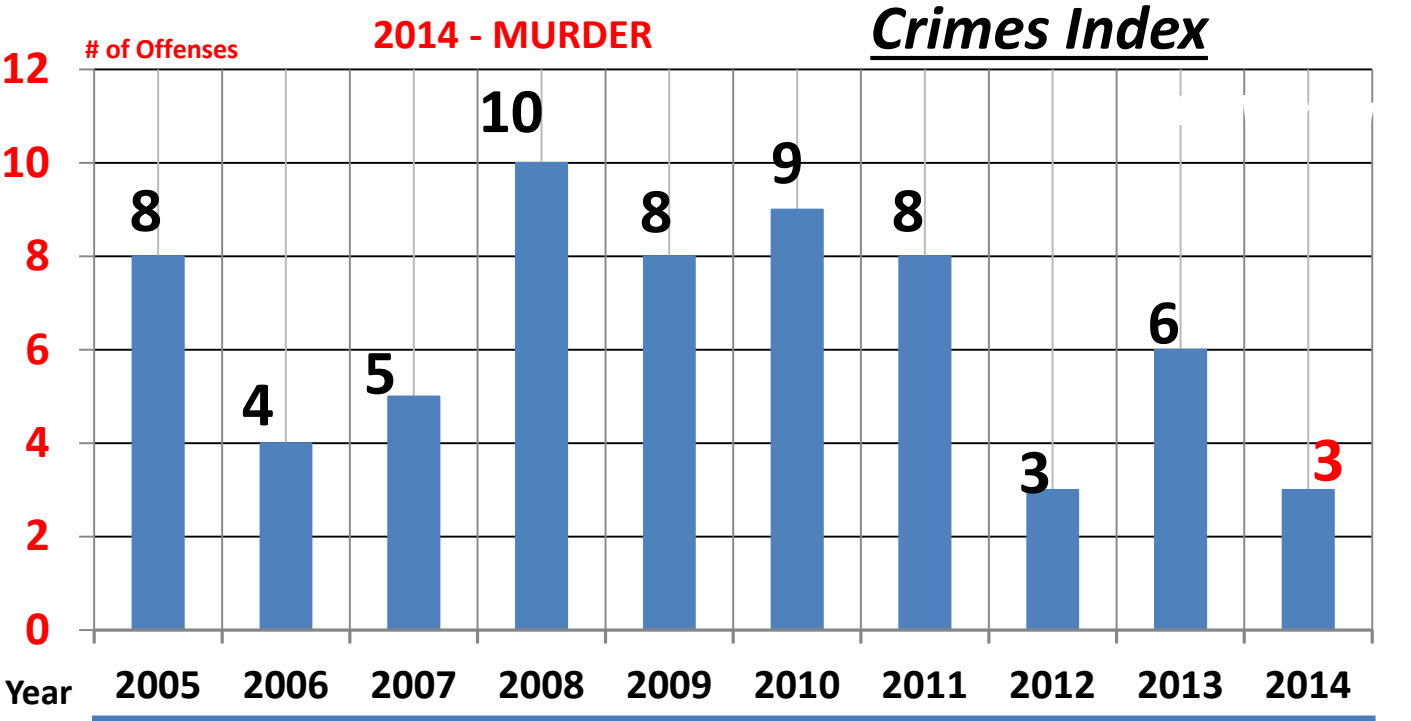

2014 Crime Index of Offenses

Index Offenses	Number	Crime Rate
Murder	3	6.98
*Forcible Rape	15	34.90
*Other Forcible Sex Offenses	29	67.48
Robbery	58	134.96
Aggravated Assault	108	251.31
Breaking and Entering	394	916.81
Larceny	1,320	3071.55
Motor Vehicle Theft	60	139.62
Arson	11	25.59
Total	**1995**	**4642.23**
Accidents	1,093	
Calls for Service	60, 009	

*NOTE: In an effort to maintain transparency and the continuity of information, the department will report Forcible Rape and Other Forcible Sex Offenses as 2 separate categories from calendar year 2014 forward. Other Forcible Sex Offenses includes the following: Forcible Sodomy, Forcible Fondling, and Forcible Object Penetration.
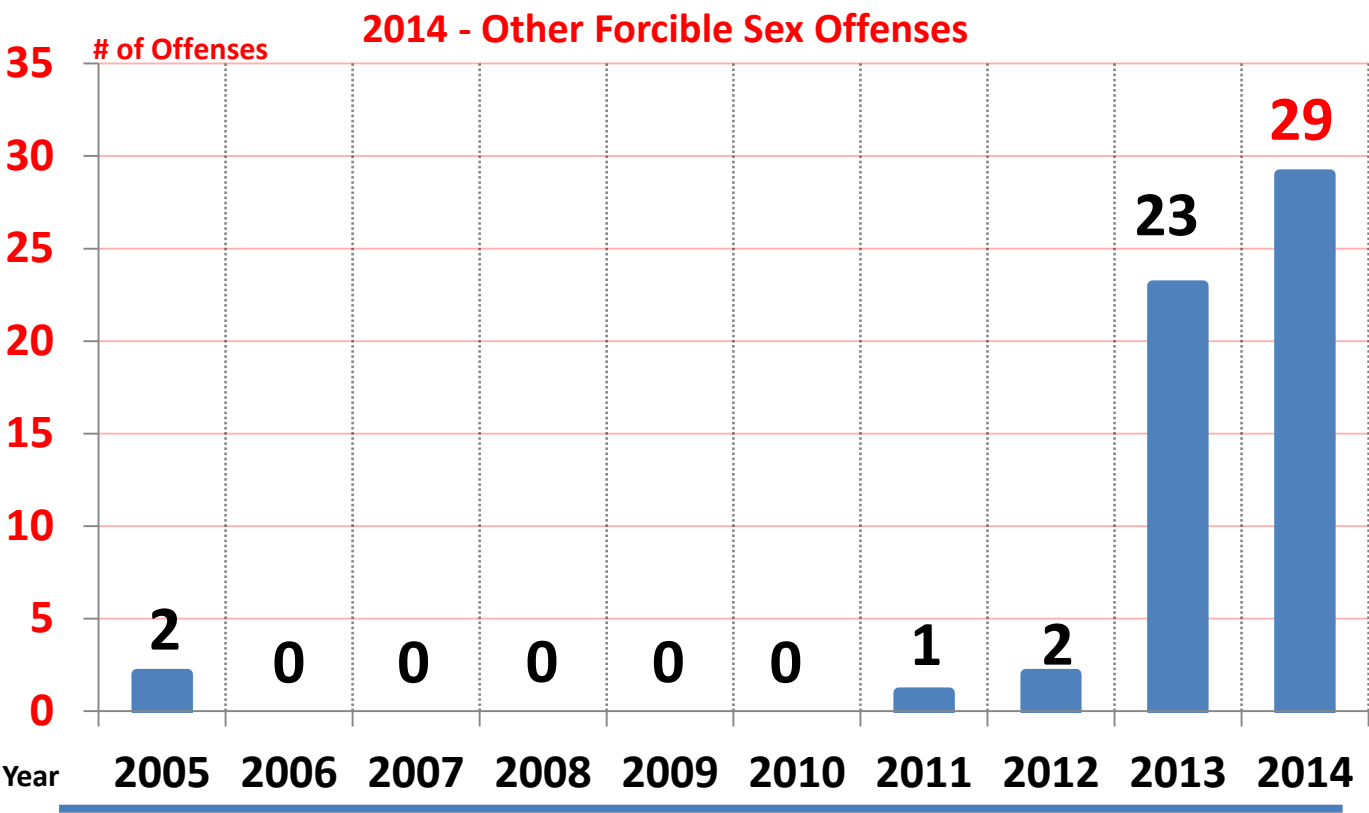

Population (42,975) divided by 100,000 = .42975
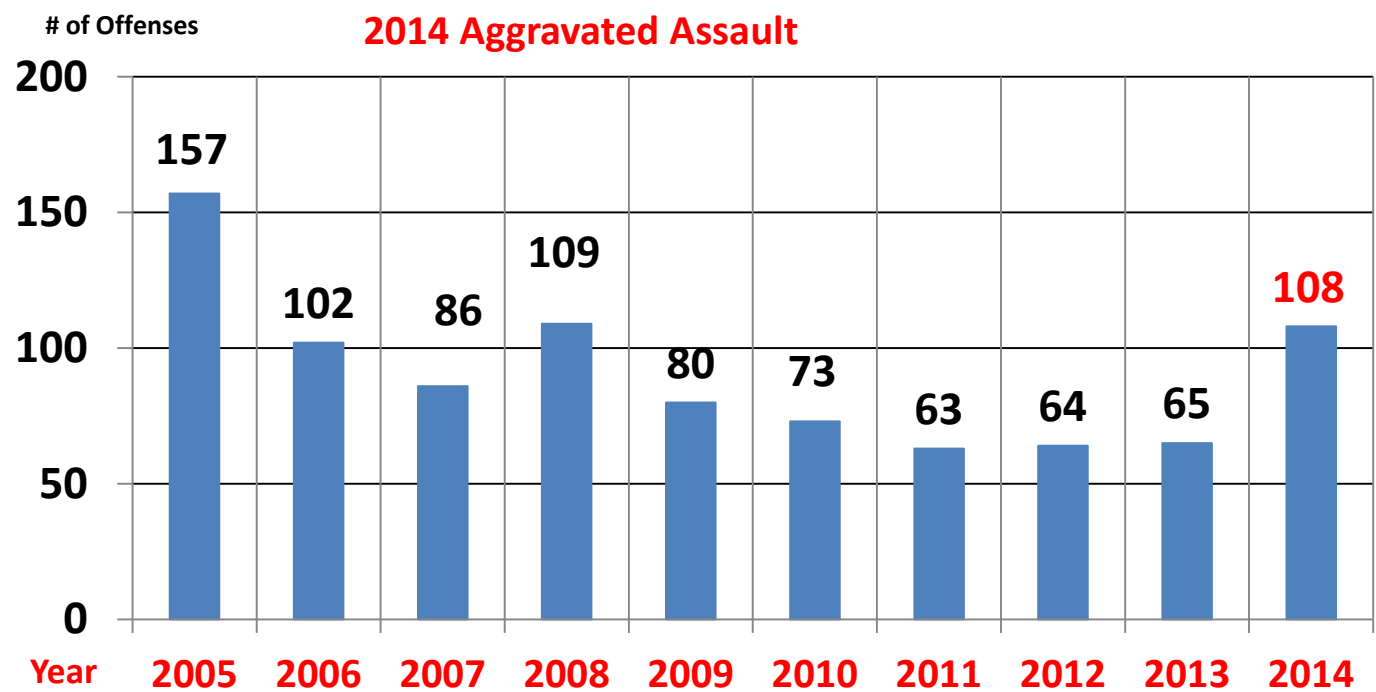

# of offenses divided by .42975 = Crime Rate

Directed Patrol Techniques

Department-Wide Directed Patrol

2014 brought the implementation of Department-wide directed patrol techniques. Previously this technique had been successfully used by the Community Police section and on a case-by-case basis by the Patrol Division. By using location and time data on reported crimes, proactive patrols are directed into geographic areas with higher probabilities of crime occurrence. The Department continues to work toward using data to more efficiently direct patrol activities, including using DDACTS - Data-Driven Approach to Crime and Traffic Safety - an operational model developed through a partnership between the Department of Justice and the National Highway Traffic Safety Administration. This technique involves the overlay of crime and traffic crash data to help direct resources to have a proactive impact on traffic safety and crime, since vehicle travel is such an integral component of our mobile society. This process also leverages the deterrence value of highly visible enforcement actions.

Ten Year Warrant Trend

The Danville Police Department handles warrants many ways. Officers obtain warrants for crimes they are assigned to investigate or officers serve warrants obtained by other parties such as private citizens or other law enforcement agencies. The management of these documents falls to the Police Records Division. Once a warrant is obtained, it is entered into the Records Management System(RMS) and is tracked from entry to service. Warrants are also entered into the state and/or national wanted persons data base. Our warrant totals generally average in the thousands and range in subject matter from unpaid parking tickets to homicide. The graph below depicts a ten year trend in warrants handled by the Danville Police Department.

Implementation of Law Enforcement Technology & Equipment

Department-wide deployment of Body-Worn Cameras

The Danville Police Department first deployed 10 law enforcement grade body-worn cameras on officers of the Street Crimes Unit in 2011. This was such a success that the following year Department of Justice grant funds were used to purchase 8 additional cameras so that each member of the unit had an individual device. In 2013 the Office of the Attorney General of Virginia accepted grant-style applications from local agencies for a one-time transfer from the Asset Forfeiture Funds related to the Abbott Laboratories plea agreement. Through this program the Department received $169,593.00 in funds to purchase cameras and related data storage/management services for all sworn members whose daily activities involve enforcement actions. With these funds the Department purchased 96 body worn cameras, related hardware, infrastructure upgrades and 4 years of hosted data storage/management services.

Body Worn Cameras

Public Safety Systems Enhancements

In the spring of 2014, the Police Department fully launched our Police 2 Citizen (P2C) site. This internet-based system, which was a part of the public safety system upgrade in 2012, allows the public to easily obtain copies of crash reports and incident reports at no cost, view recent arrests, active warrants, most wanted persons, make inmate inquires for Danville Adult Detention and Danville City Jail, and to submit on-line commendations of Department personnel. This site not only saves citizens the time and expense associated with coming down to the Police Department to obtain copies of reports, it saves the time of Records clerks who would have to handle these transactions in person. This initiative was funded with a planned capital improvement project and grant funding.

Public Safety Systems Enhancements

Information Technology Department GIS (Geographical Information System) programmer Tim Shortly worked with the Police Department to create a community crime mapping application that allows citizens to access information about crimes in specific geographical areas of the city. The crime data displayed on this application reflects the eight Part I Offenses defined by the FBI's Uniform Crime Reporting (UCR) Program which include Homicide, Forcible Sex Offense, Robbery, Aggravated Assault, Burglary, Grand Larceny, Motor Vehicle Theft, and Arson and covers the current plus three previous year's data. The information can be view on a police beat or sub-beat level with a color gradient that represents crime frequency in those specific areas. This application was made available in June of 2014 and can be accessed from the Department web or P2C site.

In-Car Video Replacement

In-Car Video Replacement

The Police Department began a complete replacement of our in-car video systems. The old systems had been in service close to 8 years and represented our first step from analog VHS tape to a completely digital format. Audio/video and related technology changed considerably in that span of time and the manufacturer's current version offered many significant improvements. These new systems include high definition (HD) cameras that produce crisp, clear recordings that also perform well in low light conditions.   The previous system was configured with a single forward facing camera, so a second camera was added to record the rear prisoner transport compartment area of the vehicle. This provides an added safety measure for officers, as they are able to quickly glance at the in-car laptop screen to see what a prisoner may be doing in the back seat without having to completely turn around. Additionally, the camera documents any actions or statements the arrestee may make while in police custody inside the vehicle as well as his/her outward physical condition.

In-Car Video Replacement

The new wireless microphones now have up to a mile range, compared with the line-of-sight range of the older versions. New features also include an impact/crash sensor that automatically triggers the system to record automatically in the event of a collision, back up battery for the recorder in the event of sudden loss of the vehicle's primary power supply, and integrated wireless backhaul of recorded data over Wi-Fi instead of over the vehicle's cellular modem which frees up bandwidth to improve the operation of the other vehicle-based systems. Additionally, the old 3G wireless modems were upgraded to LTE 4G versions to take advantage significant infrastructure improvements made by our wireless carrier over the past two years. This initiative was funded with a planned capital improvement project and grant funding.

Interview / Interrogation Room Video Replacement

The Department was also able to leverage the new in-car video system replacement project to upgrade our existing Interview/Interrogation Room recording system. The old system was custom built in-house and recorded directly to a DVD, which then had to be physically stored in our Property and Evidence Vault. The new system's features include the addition of a second camera to cover the entire room, HD quality cameras and an improved microphone that can pick up a whisper. This new system utilizes the same back-end video evidence management system used to store in-car video. The back-end system is the heart of any law enforcement video recording implementation that allows the data to be stored in a secure and fully auditable manner with scheduled retention periods, just the same a physical piece of evidence collected by the Department. This initiative was funded through a federal grant.
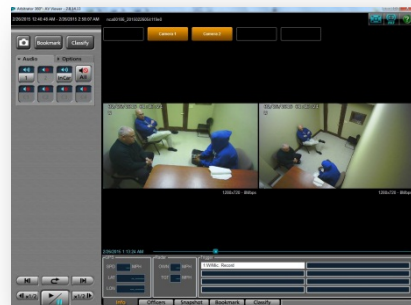

Electronic Summons Implementation (E-Tickets)

During the latter part of 2014, the Department made the necessary hardware purchases to implement an electronic summons system that was anticipated as a part of the previous upgrade of our RMS (Records Management System) and Mobile Field Reporting system. Commonly referred to as eSummons or eCitation, this system allows for the printing of Virginia Uniform Summonses (traffic tickets) in the mobile environment of a police vehicle. The most significant efficiency of this system is that summons data is transmitted securely into our RMS, then transferred daily to the Virginia Supreme Court where is it available for our local courts. Though initially scheduled for implementation in the previous year, this project was postponed to coincide with the significant vehicle system rework related to the in-car video replacement. This allowed the Department to install hardware for the in-car video replacement, modem upgrade and eSummons printer hardware all at one time, thereby saving on labor costs and vehicle down time.

Electronic Summons Implementation (E-Tickets)

In the fall of 2014 the Department began transmitting eSummons data to the Virginia Supreme Court and later during 2015 we will begin using the printer hardware in the vehicles once installation is completed and the system is fully online. The eSummons project will improve efficiency by reducing the time it takes an officer to issue a traffic summons, significantly reducing or eliminating the duplicate keying of information into systems by the Departments Records Office and court personnel and improve document legibility and accuracy. This initiative was funded with a planned capital improvement project.

Grants for Fiscal Year 2014 / 2015

- **Speed Selective Enforcement Grant: $12,732**: Virginia DMV pass through from the U.S. Department of Transportation National Highway Traffic Safety Office for selective enforcement pay and equipment purchase

- **Alcohol Selective Enforcement Grant**: **$10,781**: Virginia DMV pass through from the U.S. Department of Transportation National Highway Traffic Safety Office for selective enforcement pay

- **Department of Justice JAG Grant: $22,213**: For mobile forensic solution for advanced extraction, decoding, analysis and reporting of evidentiary data from mobile devices and new mobile applications that will extend core Computer Aided Dispatch and Records Management System functionality to authorized mobile devices used by law enforcement officers in the field.

- **Department of Justice Bulletproof Vest Partnership Grant: $28,969.23**: The Bulletproof Vest Partnership (BVP), created by the Bulletproof Vest Partnership Grant Act of 1998 is a unique U.S. Department of Justice initiative designed to provide a critical resource to state and local law enforcement. This grant provides funds to pay for 50% of the cost of body armor for Danville Police Officers.

Awards and Recognition

Awards

The Danville Police Department is keenly aware of the contributions made every day by our officers and the citizens we serve. In an effort to recognize those accomplishments, we designate this section to their accomplishments and successes.

Cpl S. C. Bray

Saved By The Belt Awards

Off. E. R. Crane

Mr. David Hawker & Mr. Zachary McDowell

Dep. A. K. Haley

Each year the department reviews crash data with the intention of locating reports where it is evident the proper use of safety equipment such as safety belts and airbags reduced or eliminated the likelihood of serious injury or death. These citizens are recognized for "Making the Right Choice" concerning the use of safety belts.

Traffic Safety Appreciation Awards

Additionally, we recognized area organizations and citizens that participated and / or supported the awareness and educational offerings of the department in the arena of traffic safety. These representatives consistently displayed the public's best interest in all things traffic safety related and made every effort to promote our message with their support.

Officer Traffic Safety Awards

Although the faces of the officers who regularly perform at exceptional levels changes somewhat from year to year, the number of officers remains fairly consistent. In many cases there are mere single digit numbers separating a top performer from a runner up.

Officer Martin is presented with Top Performer Awards for 1st, & 4th Quarter Performance in Seat Belt Enforcement

Officer Abbott is presented with a Top Performer Award for 2nd Quarter Seat Belt Enforcement

Officers Wilson & Harn are presented with Top Performer Awards for 2nd Quarter DUI Enforcement and Off. Shively is presented with a Top Performer for DUI Enforcement 4th Quarter

Officer Parks is presented with Top Performer Awards for 2nd & 3rd Quarter DUI Enforcement

Awards and Recognition

Officer Traffic Safety Awards

This consistent level of enforcement is testament of the dedication to traffic safety of the men and women of the Department and is evidenced by the continued reduction in the number of traffic crashes reported each year.

Cpl McCormick is presented with a Top Performer Award for 2nd Quarter DUI Enforcement

Cpl Bray is presented with a Top Performer Award for 3rd Quarter DUI Enforcement

Officer Merrill is presented with a Top Performer Award for 3rd Quarter DUI Enforcement

Awards and Recognition

Special Events

Attempts are regularly made to recognize and publicize special events connected to the Department and the milestones accomplished by our employees. These events can cover service awards, retirements and everything in between.
