

# CITY OF DANVILLE, VIRGINIA

## MS4 Permit ANNUAL REPORT

VSMP GENERAL PERMIT REGISTRATION NUMBER  
VAR040018

REPORTING PERIOD JULY 1, 2022 – JUNE 30, 2023

Revised: January 5, 2024

## MS4 Annual Report

### I.D.2.a

- **Permittee/System Name:** City of Danville
- **Permit Number:** VAR040018

### I.D.2.b

- **Annual Report Year:** July 1, 2022 – June 30, 2023

### I.D.2.e

**Evaluation of MS4 program implementation:** It appears that the City of Danville is in compliance with all applicable permit conditions. The City has implemented BMPs for each of the Six Minimum Measures and will continue to review existing BMPs, policies, procedures, and supporting documents. Each minimum standard is discussed below.

- MCM#1 (Public Education & Outreach): The City of Danville has implemented all BMPs listed in the Program Plan and met the associated goals.
- MCM#2 (Public Involvement/Participation): The City of Danville has implemented all BMPs listed in the Program Plan and met the associated goals. It appears public involvement has increased in river cleanups during this reporting period. The City is actively working towards ways to increase public involvement & participation and has seen improvement in the “Adopt-A-Spot” program.
- MCM#3 (Illicit Discharge Detection and Elimination): The City of Danville has implemented all BMPs listed in the Program Plan and met the associated goals. The prioritized outfall list was utilized during this reporting period to screen the 50 highest priority outfalls within the city.
- MCM#4 (Construction Site Stormwater Runoff Control): The City of Danville has implemented all BMPs listed in the Program Plan and met the associated goals.
- MCM#5 (Post-Construction Stormwater Management in New Development and Development on Prior Developed Land): The City of Danville has implemented all BMPs listed in the Program Plan and met all associated goals.
- MCM#6 (Pollution Prevention/Good Housekeeping for Municipal Operations): The City of Danville has implemented the BMPs listed in the Program Plan and met the associated goals.

## **MCM #1: Public Education & Outreach**

### **I.E.1.g**

The City of Danville has identified three high priority stormwater issues to meet the goal of educating the public in accordance with the Public Education and Outreach program. For the July 2022 – June 2023 reporting year, the City of Danville has identified the following three high-priority stormwater issues and the corresponding strategies used to implement them.

#### **Sediment**

Land disturbing activities create the most potential for sediment loading of local streams. The City of Danville should have the greatest control over this priority issue through administration of erosion & sediment control ordinance and stormwater management policies.

- **“Make Danville Shine”**: The City of Danville has adopted the campaign “Make Danville Shine” during the month of May. During May, Public Works allows for oversized piles of separated yard waste and household debris to be placed at residential curbsides for collection. The normal fees for appliance disposal will also be waived and up to four tires per residence can be left at the curb for free pickup. During this month, fees and waste amount restrictions are temporarily lifted, thus incentivizing property owners to properly dispose of waste. Community Development held an Expo on May 6, 2023 with home care professionals & City booths where Public Works provided stormwater management information & free yard waste bags. It is estimated that 20,000 yard waste bags were distributed during this event. A summary is attached detailing the amounts and types of waste collected and properly disposed as part of the Make Danville Shine campaign. Additional information is available at <http://www.danvilleva.gov/1678/Clean-Up-Fix-Up-Paint-Up-Month>
- **Informational Brochures**: Printed material addressing stormwater pollution is available at numerous public locations in Danville. These locations include; although are not limited to, City Hall, Public Works, and the Parks and Recreation Department. The following materials were printed and distributed during this permit year:
  - Public Works prints and distributes a Solid Waste Disposal Brochure which includes information on proper (and improper) disposal methods of residential waste. These brochures are distributed in brochure locations in public buildings, with the purchase of a trash or recycling can, mailed with receipts of purchases, or hand delivered by Code Enforcement staff. The estimated number of Solid Waste Disposal Brochures printed and distributed is 1,752.
  - Two Letters were mailed to the two local concrete suppliers on proper concrete washout procedures. A flyer was included in each letter.
  - Danville also prints and distributes EPA water quality brochures, but there were enough water quality brochures available at the brochure locations in our public buildings, so no additional EPA water quality brochures were distributed this permit year.

- City of Danville Website: A webpage is maintained on the City of Danville’s website containing information on pollution prevention, illicit discharges, stormwater management, water quality, as well as references to the related Ordinances enforced by the City. The specific webpages, number of views, view time, and other analytics are included in a chart at the end of this report. More information is available at <https://www.danville-va.gov/606/Stormwater-Pollution>.
- Environmentally Themed Events: The Danville Public Library regularly holds many events with environmental health themes geared for school-aged children.
  - Library Scouts – The Library hosts monthly meetings in the “Maker Lab” at the library to discuss upcoming programs in the community, do explorer/environmental-themed activities and crafts. They also regularly schedule Dan River Clean Up events.
  - Junior Naturalists – The Library hosts monthly meetings to learn about the natural world and understand the importance of nature through activities and crafts.
  - Creek Crawl – The Library hosts regular “creek crawls” at Anglers Park to explore the shallows of a local creek and find out what types of creatures live there. Participants learn about the importance of macro invertebrates and their life cycles.
  - Gardening at the Urban Farm – The Library hosts educational events at a local public Urban Farm at the Farmers Market. Participants learn a variety of topics focused on growing your own food, tending plots, weeding, and proper watering techniques.

The total number of Environmentally Themed Events held was 74 with a total number of attendees of 1,066. A list of all environmentally themed events held during this permit year is attached.

## **Nutrients**

Sources of nitrogen and phosphorus loading to the Dan River are present on both public and private properties. Agricultural, industrial, commercial, and residential property are potential private sources of nutrients that the City may have little control over; however, may be ultimately responsible for oversight.

- Stormwater Awareness Month: September is designated as national stormwater awareness month. For the month of September 2022, the City of Danville posts information regarding stormwater pollution prevention on the Danville employee homepage. The internal publication is attached.
- City of Danville Website: A webpage is maintained on the City of Danville’s website containing information on pollution prevention, illicit discharges, stormwater management, water quality, as well as references to the related Ordinances enforced by the City. The specific webpages, number of views, view time, and other analytics are included in a chart at the end of this report. More information is available at <https://www.danville-va.gov/606/Stormwater-Pollution>.
- Storm Drain Markers: The City of Danville collaborated with the Danville After Hours Rotary Club, the Dan River Basin Association, and the Danville Regional Foundation to

fund and install storm drain markers within the City. The first marker was installed in October 2015 and installation remains ongoing. Public Works Engineering maintains a box of the storm drain markers and periodically installs markers at known areas of suspected discharge. Overall, more than 400 storm drains have been marked “Do Not Dump, Drains to River” in high traffic areas of the city and the installations have been promoted on social media. The following storm drain markers were installed during this permit year:

Storm Drain Marker Type	Location	Storm Drain Facility ID
Aluminum Medallion	786 Doe St.	31516

- **Environmentally Themed Events:** The Danville Public Library regularly holds many events with environmental health themes geared for school-aged children.
  - Library Scouts – The Library hosts monthly meetings in the “Maker Lab” at the library to discuss upcoming programs in the community, do explorer/environmental-themed activities and crafts. They also regularly schedule Dan River Clean Up events.
  - Junior Naturalists – The Library hosts monthly meetings to learn about the natural world and understand the importance of nature through activities and crafts.
  - Creek Crawl – The Library hosts regular “creek crawls” at Anglers Park to explore the shallows of a local creek and find out what types of creatures live there. Participants learn about the importance of macro invertebrates and their life cycles.
  - Gardening at the Urban Farm – The Library hosts educational events at a local public Urban Farm at the Farmers Market. Participants learn a variety of topics focused on growing your own food, tending plots, weeding, and proper watering techniques.

The total number of Environmentally Themed Events held was 74 with a total number of attendees of 1,066. A list of all environmentally themed events held during this permit year is attached.

## **Bacteria**

Increases in the biological loading to the Dan River are primarily present in the form of animal defecation and sanitary sewer overflows. Increased levels of bacteria in water reduce the amount of available oxygen and can be detrimental to aquatic ecosystems.

- **Meaningful Watershed Educational Experience:** The Danville Science Center changed their water quality/pollution exhibit from an Enviroscape Model to their Meaningful Watershed Educational Experience (MWEE) as part of their Riverside Science Program. During this past permit year, 492 students participated in this program. The MWEE focuses on point and nonpoint sources of pollution as well as various urban and agricultural impacts on water quality resulting from the introduction of various contaminants from these settings. Students perform a variety of water quality tests to try to determine the overall health of this ecosystem.

- Informational Brochures: Printed material addressing pet waste management is available at numerous public locations in Danville. These locations include although not limited to, City Hall, Public Works, and the Parks and Recreation Department. The following materials were printed and distributed during this permit year:
    - Public Works prints and distributes a Solid Waste Disposal Brochure which includes information on proper (and improper) disposal methods of residential waste. These brochures are distributed in brochure locations in public buildings, with the purchase of a trash or recycling can, mailed with receipts of purchases, or hand delivered by Code Enforcement staff. The estimated number of Solid Waste Disposal Brochures printed and distributed is 1,752.
    - Two Letters were mailed to the two local concrete suppliers on proper concrete washout procedures. A flyer was included in each letter.
    - Danville also prints and distributes EPA water quality brochures, but there were enough water quality brochures available at the brochure locations in our public buildings, so no additional EPA water quality brochures were distributed this permit year.
  - City of Danville Website: A webpage is maintained on the City of Danville's website containing information on pollution prevention, illicit discharges, stormwater management, water quality, as well as references to the related Ordinances enforced by the City. The specific webpages, number of views, view time, and other analytics are included in a chart at the end of this report. More information is available at <https://www.danville-va.gov/606/Stormwater-Pollution>.
  - Pet Waste Stations: Waste stations and signage have been installed at nine (9) additional high pedestrian traffic areas such as the Riverwalk Trail and high-traffic walking areas to encourage proper disposal of pet waste. Attached is a list of locations with installation dates.
  - Environmentally Themed Events: The Danville Public Library regularly holds many events with environmental health themes geared for school-aged children.
    - Library Scouts – The Library hosts monthly meetings in the “Maker Lab” at the library to discuss upcoming programs in the community, do explorer/environmental-themed activities and crafts. They also regularly schedule Dan River Clean Up events.
    - Junior Naturalists – The Library hosts monthly meetings to learn about the natural world and understand the importance of nature through activities and crafts.
    - Creek Crawl – The Library hosts regular “creek crawls” at Anglers Park to explore the shallows of a local creek and find out what types of creatures live there. Participants learn about the importance of macro invertebrates and their life cycles.
    - Gardening at the Urban Farm – The Library hosts educational events at a local public Urban Farm at the Farmers Market. Participants learn a variety of topics focused on growing your own food, tending plots, weeding, and proper watering techniques.
-

The total number of Environmentally Themed Events held was 74 with a total number of attendees of 1,066. A list of all environmentally themed events held during this permit year is attached.

## **MCM #2: Public Involvement/Participation**

### **I.E.2.f(1)**

- The City of Danville Public Works Engineering Department investigated approximately 50 stormwater drainage complaints from the public during the reporting period. The public has many different avenues to contact Public Works including the Public Works switchboard, a direct line to PW Engineering, and the SeeClickFix system online. All drainage complaints are discussed by the Stormwater Drainage Committee and responded to by phone or letter. All public reports submitted through the SeeClickFix system automatically generate a Service Request through the “City Works” app, which notifies the appropriate personnel to respond. All calls to the Public Works switchboard and to PW Engineering are manually entered into the City Works app and dispatched to appropriate personnel to respond. The SeeClickFix system has options to accept public reports of illicit discharges, improper disposal, spills to the MS4, complaints about land disturbing activities, and stormwater pollution concerns. A summary of public input, comments, and complaints, with responses is attached.

### **I.E.2.f(2)**

- A web link to the MS4 Program Plan and Annual Report can be found at:  
<http://www.danville-va.gov/886/Municipal-Separate-Storm-Sewer-System>

### **I.E.2.f(3 & 4)**

The City of Danville has performed the following Public Involvement / Participation for the reporting period:

- River Cleanups: River cleanup events are scheduled and sponsored by Parks and Recreation and the Danville Science Center on the Dan River. Cleanups along the river are very direct, “boots on the ground” involvement opportunities that provide immediate improvements to water quality by removing trash and debris immediately threatening the quality of the river. A summary is attached detailing the dates, groups, numbers of participants, and amounts and types of waste collected.
- Make Danville Shine: The City of Danville has adopted the campaign “Make Danville Shine” during the month of May. During May, Public Works allows for oversized piles of separated yard waste and household debris to be placed at residential curbsides for collection. The normal fees for appliance disposal will also be waived and up to four tires per residence can be left at the curb for free pickup. During this month, fees and waste amount restrictions are temporarily lifted, thus incentivizing property owners to properly dispose of waste. Community Development held an Expo with home care professionals & City booths where Public Works provided stormwater management information & free yard waste bags. A summary is attached detailing the amounts and types of waste collected and properly disposed as part of the Make Danville Shine campaign. Additional information is available at <http://www.danvilleva.gov/1678/Clean-Up-Fix-Up-Paint-Up-Month>.

- Adopt-A-Spot: The City of Danville has implemented this program to promote public involvement in removal of trash and debris from streets and other “spots” throughout the City. Individuals, families, groups, churches, or other organizations can pick up ready-made clean up kits provided by Public Works to assist in cleaning up areas they select in the City. Public Works will install an “Adopt-A-Spot” sign at the locations to promote the program, and provide validity, ownership, and pride, to empower the groups to continue their efforts. A total of 176 bags of trash, 200 lbs. of trash (separate containers), and 47 lbs. of metal were collected by 195 total participants during this reporting period. The log of Adopt-A-Spot events, participants, dates, locations, and metrics for this reporting period is included at the end of this report.
- Waste Pickup: The City of Danville distributes free recyclable paper yard waste bags to residents via pickup from the Public Works main office. Yard waste and refuse is picked up from residents on a weekly basis. Several recycling centers are located throughout the City and the City offers a bi-weekly residential recycling pickup service. Used tires can be picked up along the curb at a cost of \$2 per passenger/light truck tire and \$5 per heavy-duty truck tire. During the 2022 – 2023 reporting period, the following services were provided:
  - 50,000 free yard waste bags distributed
  - 12,196 tons of yard waste collected
  - 877 cubic yards of litter collected
  - 10,664 tons of recycling collected
  - 1,078 used tires collected
  - 338.41 tons of street sweeping trash/debris collected
  - 14,397 tons of refuse collected
  - 438 dead animals collected

By having all of the above services available, residents and businesses are more likely to participate in the proper disposal of these items in lieu of improper disposal in drains and waterways.

#### **I.E.2.f(5)**

The City of Danville did not collaborate with any other MS4 permittees for public involvement opportunities.

## **MCM #3: Illicit Discharge Detection & Elimination**

### **I.E.3.e(1)**

The MS4 map and information table are updated to reflect any changes within the MS4 serving area. As public & private construction projects are completed, the City completes a storm sewer survey to update our Storm Sewer GIS with as-built data, which includes any new/modified/removed outfalls. Revisions were made to the MS4 map and information table during this reporting period to reflect changes that occurred within the MS4.

### **I.E.3.e(2)**

#### **Outfalls Screened During the Reporting Period:**

The City of Danville has screened 50 outfalls as part of the dry weather screening program. The MS4 Outfall Data Table confirms that no more than 50% of the outfalls screened were screened in the previous 12 month period. The City utilized the prioritized schedule to screen the 50 highest priority outfalls. No outfalls screened during this reporting period were suspect of a possible illicit discharge.

### **I.E.3.e(3)**

#### **Suspected Illicit Discharges:**

There were 16 documented illicit discharge investigations during the reporting period, 11 of which were sanitary sewer overflows separately reported to DEQ. All sanitary sewer overflows were addressed and cleaned by Public Works sanitation crews. The reports of these illicit discharges are attached. The illicit discharges were resolved in the following manner:

City of Danville - MS4 Program – General Permit Registration Number VAR040018  
Annual Report – Reporting Period July 1, 2022 – June 30, 2023

SR#	Date	Address	Details	Resolution	Follow-up activities	Closed
242467	7/25/22	1188 Kent St.	<u>*Reported by the Public*</u> The following was reported to the City by SeeClickFix: “*Improper Disposal/Spills* improper disposal of used motor oil to the right as you just enter the driveway for 188 kent street. he dumps used motor oil and store it in coolers then he will use it to start fires to burn trash in his back yard instead of disposing of it properly.”	This was inspected on 7/25/22. There was no observable illicit discharge or spill.	N/A	7/25/22
243848	8/10/22	755 Colquhoun St.	<u>*Reported by the Public*</u> The following was reported to the City by SeeClickFix: “*Illicit Discharge/Stormwater Pollution* this is the house with the water coming out on to the sidewalk. I couldn't see the address so I had guessed”	This was sent to Community Development to follow up on the discharge coming from the house. They confirmed the discharge was from a crawl space pump, which is not an illicit discharge. However, they sent a violation letter to the owner to redirect the discharge to their yard instead of onto the sidewalk since nuisance discharges across sidewalks are a separate code violation.	N/A	8/30/22
248258	10/7/22	432 Hermitage Dr.	<u>*Reported by the Public*</u> From Mike LaPrade in Community Development: “The property is currently having a sewer back up. A cleanout has popped open and sewage is running down the curbing. And into the storm system. PW is on the way to flush the area down and the facility has a contractor on the way to open up the system. Also PW is sending the flusher truck to verify our system is operating properly.”	Mike LaPrade confirmed that this issue was resolved:  “This was an old issue and the property owner repaired the issue very quickly. There was no issue for a Violation case to start. I spoke with the property manager and they were aware of it when I called.”	N/A	9/14/23

City of Danville - MS4 Program – General Permit Registration Number VAR040018  
Annual Report – Reporting Period July 1, 2022 – June 30, 2023

251051	11/19/22	348 Norwood Dr.	<p><u>*Reported by the Public*</u> The following was reported to the City by SeeClickFix: “Draining of Automotive Oil and Oil Waste into a public storm curb sewer and storage of same in unsafe containers on a public street.”</p>	Performed a site visit at 348 Norwood on 11/20/22 and found a plastic container placed on the curb with some antifreeze fluid contained inside. There was no evidence of a spill or illicit discharge at that time. I met with the property owner and asked him to properly dispose of the fluid. Performed a follow up inspection on 12/2/22 and did not see the container or evidence of any spills.	Owner complied with the request to properly dispose of automotive fluid. The City Code was discussed with the owner concerning illicit discharges.	12/2/22
259100	3/22/23	132 Mulberry Rd.	<p><u>*Originally Reported by the Public*</u> A report was forwarded by Allen Linkenhoker from DEQ that was originally forwarded from the EPA about the following report they received on 1/3/23 about someone performing automotive repairs with fluids leaking in the street: “Car repairs performed in public street that has public storm water drains. This means oil and it antifreeze or hydraulic fluids potentially leaking into the water shed and/or water system. The storm drains lead to a spring fed creek.”</p>	This was investigated on the same day it was received (3/22/23). There was no evidence of an illicit discharge at the reported address or receiving curb inlet. I spoke with the resident and they said they didn't perform any work on their cars, but don't remember seeing anyone work on a car in the street near their house in January.	N/A	3/22/23
	7/29/22	Airside Industrial Park	<p><u>*Reported by Danville Utilities*</u> The sanitary force main from the Airside pumping station developed a split which allowed approximately 2,500 gallons to be spilled onto the surrounding area. This spill made it to Cane Creek, which eventually flows to the Dan River.</p>	VA DEQ – BRRO was notified of this spill with the resolution and any follow-up activities on 7/29/22.		7/29/22
	8/30/22	210 Forestlawn Dr.	<p><u>*Reported by the Public*</u> Sewer overflow at manhole #20176 on the sanitary sewer line adjacent to Forestlawn Dr. Estimated overflow was 250 gallons. This drains to Fall Creek, which empties into the Dan River. This was caused by a blockage within the pipe. The pipe was flushed, which resolved the overflow.</p>	VA DEQ – BRRO was notified of this spill with the resolution and any follow-up activities on 8/30/22.		8/30/22

City of Danville - MS4 Program – General Permit Registration Number VAR040018  
Annual Report – Reporting Period July 1, 2022 – June 30, 2023

	10/20/22	Airside Industrial Park	<p><u>*Reported by Danville Utilities*</u> Sewer leak on the force main serving Airside System #1. The air release valve failed allowing 500 gallons of sewage to spill on the surrounding area. Public Works responded with a vacuum truck and managed the flow until the ARV was replaced.</p>	VA DEQ – BRRO was notified of this spill with the resolution and any follow-up activities on 10/20/22.	10/20/22
	2/23/23	Southside WWTP	<p><u>*Reported by Danville Utilities*</u> Sewer spill at Southside WWTP. Estimated 60,000 gallons spilled onto the surrounding ground and entered the storm drain system which discharges into the Dan River.</p>	VA DEQ – BRRO was notified of this spill with the resolution and any follow-up activities on 2/23/23.	3/23/23
	3/16/23	N. Main St	<p><u>*Reported by the Public*</u> The City of Danville had a sewer system overflow today at manhole #29191 that is located on the property of 2915 North Main St. This overflow occurred in the Fall Creek section, which is in the northeastern portion of the City of Danville. Estimated overflow was 800 gallons. Fall Creek does flow through this location and ends up flowing into the Dan River. The leak was reported at 10:00 AM and the leak was stopped at 10:15 AM. Public Works responded to the location and flushed the blockage from the line to stop the overflow. A sample was collected to be tested by the wastewater treatment facility.</p>	VA DEQ – BRRO was notified of this spill with the resolution and any follow-up activities on 3/16/23.	3/16/23

City of Danville - MS4 Program – General Permit Registration Number VAR040018  
Annual Report – Reporting Period July 1, 2022 – June 30, 2023

	4/21/23	Brianwood Dr.	<p><u>*Reported by the Public*</u> The City of Danville had a sewer system overflow yesterday between manholes #31688 &amp; #31207 that are located on the property of 114 Briarwood Dr. This overflow occurred in the section 15 Apple Branch, which is in the northeastern portion of the City of Danville. Estimated overflow was 400 gallons. A small creek does flow through this location and ends up flowing into the Dan River. The leak was reported at 11:30 AM and the leak was stopped at 12:30 PM. Public Works responded and utilized the flusher vehicle until a bypass could be set up to stop the overflow. A sample was collected to be tested by the wastewater treatment facility.</p>	VA DEQ – BRRO was notified of this spill with the resolution and any follow-up activities on 4/21/23.	

City of Danville - MS4 Program – General Permit Registration Number VAR040018  
Annual Report – Reporting Period July 1, 2022 – June 30, 2023

	6/2/23	Airside Pump Station	<p><u>*Reported by Danville Utilities*</u></p> <p>The City of Danville had a sewer system overflow yesterday at Airside Pumping Station that is located in the eastern portion of the city of Danville, VA. Estimated overflow was 5,000 gallons. The Airside section of the sewer system does have storm drainage that flows to the Dan River. The leak was noticed at 08:30 AM and the was stopped at 09:00 AM. A private septic hauler was called in to the location and pumped down the dry pit area of the station. The power was restored to the outside breaker of the station that stopped the overflow. <b>No</b> sample was collected to be tested by the wastewater treatment facility as typically done under normal overflow situations. Maintenance staff did wash down the station area and applied lime to the affected areas at the station. Due to the excessive rainfall and high stream levels in the area, no adverse effects have been noted by the discharge.</p>	VA DEQ – BRRO was notified of this spill with the resolution and any follow-up activities on 6/2/23.	6/2/23

City of Danville - MS4 Program – General Permit Registration Number VAR040018  
Annual Report – Reporting Period July 1, 2022 – June 30, 2023

	6/15/23	1038 Monument St.	<p><u>*Reported by Danville Utilities*</u> The City of Danville had a sewer system overflow today near 1038 Monument St. that is located in the eastern portion of the city of Danville, VA. Manhole location was #12283. Estimated overflow was 1,000 gallons. This location is adjacent to the river and does have storm drainage that flows to the Dan River. The leak was reported at 1:10 PM and the was stopped at 03:15 PM. The cause of the overflow was a broken pipe. Public Works setup a bypass pumping equipment until the pipe can be repaired. A sample was collected at 02:45 to be tested by the wastewater treatment facility as typically done under normal overflow situations.</p>	VA DEQ – BRRO was notified of this spill with the resolution and any follow-up activities on 6/15/23.	6/15/23
	6/23/23	435 Whittington Dr.	<p><u>*Reported by the Public*</u> The City of Danville had a sewer system overflow yesterday near 435 Whittington Drive that is located in the western portion of the city of Danville, VA. Manhole location was #11090. Estimated overflow was 500 gallons. This location is adjacent to the river and does have storm drainage that flows to the Dan River. The leak was reported at 05:40 PM and the was stopped at 07:40 PM. The cause of the overflow was roots blocking flow in pipe. Public Works flushed the pipe until flow was restored. A sample was collected at 06:30 PM to be tested by the wastewater treatment facility as typically done under normal overflow situations. Sample was delivered to the Northside WWTP this morning.</p>	VA DEQ – BRRO was notified of this spill with the resolution and any follow-up activities on 6/23/23.	6/23/23

City of Danville - MS4 Program – General Permit Registration Number VAR040018  
Annual Report – Reporting Period July 1, 2022 – June 30, 2023

		<p><u>*Reported by the Public*</u>  The City of Danville had a sewer system overflow yesterday (06/22/23) at Gilbert Dr. Pumping Station that is located in the eastern portion of the city of Danville, VA. Estimated overflow was 4,000 gallons from the wet well and 1,000 gallons of that made it to the adjacent creek nearby. A higher-than-normal flow conditions into the station from heavy rainfall (I&amp;I) in the system lead to the overflow. The Gilbert Dr. section of the sewer system does have storm drainage that flows to the Dan River. The high flow conditions were noticed to occur between 17:00 to 17:30 PM. Normal flow conditions resumed, and the overflow was stopped around 17:45 PM when the pumps were able to handle the flow conditions coming into that station. A private septic hauler was called in to the location and assisted with cleanup of the area around the station. <b>No</b> sample was collected to be tested by the wastewater treatment facility as typically done under normal overflow situations. Maintenance staff did wash down the station area and applied lime to the affected areas at the station. Due to the excessive rainfall and high stream levels in the area, no adverse effects have been noted by the discharge</p>	<p>VA DEQ – BRRO was notified of this spill with the resolution and any follow-up activities on 6/23/23.</p>

City of Danville - MS4 Program – General Permit Registration Number VAR040018  
Annual Report – Reporting Period July 1, 2022 – June 30, 2023

	6/26/23	2805 Riverside Dr.	<p><u>*Reported by Danville Public Works*</u></p> <p>The City of Danville had a sewer system overflow Saturday June 24<sup>th</sup> at 2805 Riverside Drive that is located in the central portion of the city of Danville, VA. Manhole location was #21182. Estimated overflow was 100 gallons. This location is adjacent to the river and does have storm drainage that flows to the Dan River. The leak was reported at 06:55 PM and the was stopped at 08:00 PM. The cause of the overflow was grease from restaurant blocking flow in pipe. Public Works flushed the pipe until flow was restored. A sample was collected at 07:10 PM to be tested by the wastewater treatment facility as typically done under normal overflow situations. Sample has exceeded holding time and will not be processed.</p>	VA DEQ – BRRO was notified of this spill with the resolution and any follow-up activities on 6/26/23.	6/26/23

## **MCM #4: Construction Site Stormwater Runoff Control**

### **I.E.4.d(1)(a)**

All land disturbing projects that occurred during the reporting period from July 1, 2022 – June 30, 2023 have been conducted in accordance with the current Virginia Erosion and Sediment Control regulations and the Virginia Stormwater Management Program regulations.

### **I.E.4.d(2)**

#### **Number of Inspections:**

A total of 941 inspections were completed for land disturbing activities during this reporting cycle.

### **I.E.4.d(3)**

#### **Enforcement Actions Taken:**

When a violation is encountered during an inspection, the first step is a verbal or informal written notification to the permittee with a due date. If the verbal/informal written notification is not addressed within the timeframe, an Inspection Report listing the violations with a correction due date is issued. If the violations still persist, if the violations were minor in nature, a second notice Inspection Report may be sent with an extended due date. If the items are more significant, a Notice To Comply will be sent to the permittee with a due date. If the Notice to Comply is not adequately responded to, a Stop Work Order is issued, meaning all other land disturbing work must stop until the violation is resolved. Stop Work Orders are also used when someone is working without an approved plan.

There were 4 total verbal reports and 35 written Inspection Reports given during the reporting period. There were 6 total written Notices to Comply given during the reporting period. There was 1 Stop Work Order issued. All violations have been resolved.

## **MCM #5: Post Construction Stormwater Management**

### **I.E.5.i(1)(a)**

There were eight (8) inspections performed on privately owned stormwater management facilities during this reporting period. The City of Danville has inspected the privately owned stormwater management facilities in our database to ensure that all private facilities are inspected once every 5 years.

### **I.E.5.i(1)(b)**

The City of Danville sent letters to seven (7) private stormwater management facility owners with required or recommended maintenance actions from the facility's inspection report. City staff met with the owners or their maintenance representatives to discuss the methods of repair. The deficiencies were corrected to bring the facilities back into good working conditions. There were no enforcement actions taken for privately owned stormwater management facilities.

### **I.E.5.i(2)**

There were 25 inspections conducted on stormwater management facilities owned/operated by the City of Danville.

### **I.E.5.i(3)**

There was one recommended maintenance item:

1. Dan Daniel Park Detention Pond (Facility ID#1044):
  - a. Remove dead trees that were down and remove overgrowth of brush/trees along access road.
    - i. This work is being scheduled to be completed.

### **I.E.5.i(4)**

There were four new stormwater management facilities brought online during this reporting period.

<b>Date Installed</b>	<b>Facility Name</b>	<b>BMP Type</b>	<b>Acres Treated</b>	<b>VAHU6</b>	<b>Lat</b>	<b>Long</b>
01/06/23	Hampton Inn	MTD	0.24	RD39	36.5971	-79.4034
01/25/23	Leggett Office	Dry Detention	0.79	RD33	36.5970	-79.4792
04/14/23	Biscuitville	Underground Dry Detention	1.22	RD37	36.6228	-79.4039
05/25/23	GWHS	Underground Dry Detention	3.53	RD33	36.5858	-79.4165

### **I.E.5.i(5)**

All BMPs brought online during this reporting period have been submitted electronically to the Stormwater Construction General Permit database or the BMP Warehouse by October 1, 2023.

## **MCM #6: Pollution Prevention/Good Housekeeping for Municipal Operations**

### **I.E.6.q(1)**

#### **Municipal Standard Operational Procedures:**

The “Stormwater Operations & Maintenance Plan” is available to applicable City employees. This document provides general guidelines and standard operating procedures for municipal operations for City personnel. The procedures include: the recognition and prevention of illicit discharges, proper disposal of wastes, procedures for good housekeeping, requirements for VESCP and VSMP certifications as well as a written training plan implemented for all applicable staff and hired contractors.

### **I.E.6.q(2 & 3)**

#### **Development & Implementation of a Required SWPPP:**

The following facilities currently have VPDES permit coverage from DEQ: Public Works Facility, Utilities Complex, and Danville Regional Airport. Each of these permits require SWPPPs. There have not been any new SWPPPs developed or modified and no facilities have been delisted in accordance with Part I.E.6 of the MS4 General Permit.

### **I.E.6.q(4)**

#### **Development & Implementation of a Turf and Landscape Nutrient Management Plan:**

The following locations have Nutrient Management Plans:

<b>Location</b>	<b>Lat/Long</b>	<b>Acres</b>	<b>Ex. NMP</b>	<b>Exp. Date</b>
Dan Daniel Park	36.57662 / -79.37166	9.80*	Yes	8/1/2024
Ballou Park	36.57276 / -79.42143	12.16*	Yes	8/1/2024
Carrington Pavilion	36.58535 / -79.38363	3.36*	Yes	8/1/2024

*\*This is combined acreage and not necessarily contiguous areas however, each location has at least 1 acre of contiguous area.*

All of the above Nutrient Management Plans were revised and updated by a certified Nutrient Management Planner on 8/1/2021.

### **I.E.6.q(5)**

#### **Summary Report on Training:**

The City of Danville trained 145 employees during this permit cycle to meet the requirements of Part I.E.6 of the MS4 General Permit. Training reports are attached with dates and employees. The objectives of all trainings were to describe common stormwater pollutants, identify categories covered under the NPDES, and discuss methods of preventing stormwater pollution.

## **Stormwater Pollution Prevention**

### **Description**

The City of Danville is required to meet the requirements of the General Permit for Discharges of Stormwater from Small Municipal Separate Storm Sewer Systems, more commonly known as a MS4 Permit. Many people do not realize that there are two completely separate sewer systems throughout the City. The sanitary sewer system includes all bathroom and kitchen wastewater that flows primarily by gravity to the wastewater treatment plant. The stormwater sewer system collects rainwater from roads, parking lots, and gutters and discharges it directly to the Dan River without treatment. Because of this lack of treatment, it is extremely important that citizens be aware of the potential dangers of stormwater pollution.

Stormwater Pollution can generally be described as anything other than rain water being discharged to the Dan River. This includes sediment from construction sites, gasoline washing off parking lots, animal waste along the Riverwalk Trail, and even grass clippings dumped into drainage channels.

**It is the responsibility of all City of Danville employees to be aware of the sources of pollution to the Dan River and reporting the findings immediately.**

### **Reporting Stormwater Pollution**

If you suspect that someone is polluting the Dan River by discharging an illegal substance, you should contact Public Works immediately by calling (434) 799-5245 or emailing [pubworks@danvilleva.gov](mailto:pubworks@danvilleva.gov).

The City also subscribes to the online and mobile service SeeClickFix. This service provides a convenient way for all citizens to report problems based on location. Smartphone users are encouraged to download the app at <https://en.seeclickfix.com/>.

### **Danville City Code**

Section 9-179.24 of the Danville City Code states that, "No person shall discharge or cause to be discharged into the municipal storm drain system or watercourses any materials, including but not limited to pollutants or waters containing any pollutants that cause or contribute to a violation of applicable water quality standards, other than stormwater."

Section 13-47 of the Danville City Code requires a Pollution Prevention Plan in accordance with 9VAC25-870-56. The pollution prevention plan shall include effective best management practices to prohibit illegal discharges of wastewater or pollution

### **Non-Compliance and Fines**

The City of Danville will notify, in writing, of non-compliant illegal discharges and set a deadline for all observed code violations to be remedied. In accordance with Section 9-179.37 and Section 13-6 of the Danville City Code, will issue a \$100 fine per day for each listed violation. The City also reserves the right to recoup administrative and remediation costs associated with illegal discharges.

242467	1188 Kent St	2022-07-25 12:03 PM	P-ENG-I-Misc Spills Illicit Discharge	P-ENG	*Improper Disposal/Spills* improper disposal of used motor oil to the right as you just enter the driveway for 188 kent street. he dumps used motor oil and store it in coolers then he will use it to start fires to burn trash in his back yard instead of disposing of it properly.	This was inspected on 7/25/22. I did not see any observable illicit discharge or spill.
244464	129-169 Park Ave	2022-08-18 03:51 AM	P-ENG-I-Misc Spills Illicit Discharge	P-ENG	*Improper Disposal/Spills* The dump trucks leaving the casino going up Park avenue are dropping big rocks.. it's only a matter of time before somebody hits it and causes damage to the vehicle they need to be cleaning it up as they go	This issue has been communicated to the Casino's contractor to resolve. Thank you.
257854	360 Hanley Cir	2023-03-05 11:40 AM	P-ENG-I-Misc Spills Illicit Discharge	P-ENG	*Improper Disposal/Spills* Trash lined up on side of street for weeks, address is approximate	This issue appears to be an illegal accumulation and a City Code violation; therefore, has been given to Public Works Code Enforcement for investigation. SR#257946
259100	132 MULBERRY RD, DANVILLE, VA, 24540	2023-03-22 04:17 AM	P-ENG-I-Misc Spills Illicit Discharge	P-ENG	A report was forwarded from the EPA and DEQ about a report they received on 1/3/23 about someone performing automotive repairs with fluids leaking in the street. See attached email from DEQ.	I visited the site today and did not see any evidence of an illicit discharge at the reported address or receiving curb inlet.
243739	750 Colquhoun St	2022-08-09 03:36 AM	P-ENG-I-Storm Drain Illicit Discharge	P-ENG	*Illicit Discharge/Stormwater Pollution* water is draining from this home on the side walk	This is a duplicate SR. See SR243848
243848	755 Colquhoun St	2022-08-10 03:59 AM	P-ENG-I-Storm Drain Illicit Discharge	P-ENG	*Illicit Discharge/Stormwater Pollution* this is the house with the water coming out on to the sidewalk. I couldn't see the address so I had guessed	This was sent to Inspections to follow up on the discharge coming from the house. They confirmed the discharge was from a crawl space pump, which is not an illicit discharge. However, they sent a violation letter to the owner to redirect the discharg
248258	432 HERMITAGE DR, DANVILLE, VA, 24541	2022-10-07 10:45 AM	P-ENG-I-Storm Drain Illicit Discharge	P-ENG	From Mike LaPrade: The property is currently having a sewer back up. A cleanout has popped open and sewage is running down the curbing. And into the storm system. PW is on the way to flush the area down and the facility has a contractor on the way to open up the system. Also PW is sending the flusher truck to verify our system is operating properly.	Mike LaPrade confirmed that this issue was resolved:  *This was an old issue and the property owner repaired the issue very quickly. There was no issue for a Violation case to start. I spoke with the property manager and they were aware of it when I
251051	348 Norwood Dr	2022-11-19 05:39 AM	P-ENG-I-Storm Drain Illicit Discharge	P-ENG	*Illicit Discharge/Stormwater Pollution* Draining of Automotive Oil and Oil Waste into a public storm curb sewer and storage of same in unsafe containers on a public street.	Performed a site visit at 348 Norwood and found a plastic container placed on the curb with some antifreeze fluid contained inside. I met with the property owner and asked him to properly dispose of the fluid. Performed a follow up inspection on 12/2
265165	524 Claiborne St	2023-06-19 10:08 AM	P-ENG-I-Storm Drain Illicit Discharge	P-ENG	*Illicit Discharge/Stormwater Pollution* this storm drain is so over grown. it is not draining anymore. all the runoff is going in my yard. Is there something the city can do to help fix this water problem?	To SCF: Public Works is investigating the culvert under the road to determine if a repair is needed.
261564	171 MELBOURNE CIR	2023-04-24 11:45 AM	P-ENG-I-Waterway Illicit Discharge	P-ENG	creek behind neighbors house (165 Melbourne) has debris that has stopped up the creek and debris has washed onto her property causing issues with her insurance company.	
243721	1713 N Main St	2022-08-09 12:23 PM	P-ENG-O-Land Disturbance Complaint	P-ENG	*Land Disturbance* Huge tree collapsed 8/15/22 after storm in back yard of 1713 N. Main. It fell on homeowners detached garage destroying it and neighbors fence 24 days ago and homeowner has done little to remove debris and garage. There is also another tree badly leaning and threatens to fall on the house next door at 1711 N. Main Street. Please help. I am Rick Beltz and own 1711 N. Main. (434)203-7592.	SR#243734 Investigated by Public Works crew. Private tree issue in the back yard.

Re: City of Danville – Sewage spill at Southside WWTP

Dear Ms. Cathy Kibler:

The City of Danville had a sewage spill at our Southside Wastewater Treatment Plant yesterday February 22, 2023. This occurred in the southeastern portion of the City of Danville. We encountered a turnover in the biosolids storage basin recently. We had stopped pumping into the storage basin to contain the floatable solids associated with the turnover from going back the Northside WWTP. It was decided that the supernatant from the storage basin would be pumped to the old digester tank(s) for storage until it could be gradually pumped to Northside facility in a manageable manor for additional treatment. The discharge pipe into the digester became unsecured and fell outside the tank allowing the pump discharge onto the tank berm. This discharge ended up into the storm drain system for the facility and went out the outfall known as 004. The calculated volume of discharge is 60,000 gallons of sewage spilled out on to the surrounding grounds. The operator discovered the spill occurring at noon, then immediately stopped the pump to prevent further discharge. Crews then began to create berms to contain the spill from further entering the storm water discharge system and ending up in the Dan River.

A local septic hauler was called in to assist with collecting as much of the spilled liquid that had been contained and returning that liquid to the solids basin. Efforts are being made to collect as much of the spill that has collected in the adjacent swampy area just outside of the outfall discharge. Samples were collected at the point of entry into the Dan River to be tested by the wastewater treatment facility. Observations of the discharge into the Dan River did indicate that the plume remained near the riverbank until mixing into the natural flow of the river around the Northside WWTP discharge header located just downstream. Further actions are ongoing to neutralize the spill area with lime.

This letter is being sent in accordance with our VPDES permit concerning sewer spills, The DEQ Significant Spill Report Form 11 is attached. Should you have any questions on this matter, please feel free to contact me.

Sincerely,

Alan Johnson  
Director of Water & Wastewater Treatment

## SIGNIFICANT SPILL REPORT

Complete this form for each significant spill incident. Keep original form with the SWPPP document.

INCIDENT DATE: 02/22/2023 INCIDENT TIME: 11:00 am  
 REPORT DATE: 02/23/2023 DISCOVERY TIME: 12:15 pm  
 LOCATION: Danville, VA Southside WWTP located on Gypsum Road  
 PERSON REPORTING: Alan Johnson, City of Danville PHONE: 434-799-6473  
 MANAGER IN CHARGE: Al Gould, Inframark PHONE: 434-799-5137

## SPILLED PRODUCT INFORMATION:

Product: Treated Sewage Biosolids  
 Storage Capacity of Product Container: 7.5 MG  
 Spill Volume: 60,000 gallons  
 Size of Area Affected by Release: 1.5 acres  
 Duration of Release: 1 hour

Spill from or suspected from a leaking tank, container, or piping? YES NO  
 Spill contained on premises? YES NO  
 Did the spill enter the stormwater drainage system? YES NO  
 Did the spill enter a body of water? YES NO  
 Nearest body of water or body of water the spill entered? unnamed tributary to Dan River Distance: < 0.25 miles

## DESCRIPTION: (check all applicable)

- ☐ Leaking drums/containers ☐ overfill, vehicle unattended ☒ equipment failure  
☐ Leaking tank/lube truck ☐ drive off, hose in vehicle ☐ other human failure  
☐ Overfill, during fuel drop ☐ other (than storage device or equipment failure or human error)

Amount of spill control supplies used/to be restocked: 1 skid of lime (2000 pounds)

Type and amount of material to be disposed: As much as possible, the liquid portion was collected and returned to A Basin. Plans being made to scrape/excavate area to fill a 20 yard hopper for disposal.

Measures taken to prevent recurring incidents: Additional securing measures taken at end of discharge pipe outlet into digester tank.

Additional Pertinent Information: Sample collected by K. Wickemeyer/ R. Clifton for BOD analysis. Spill occurred during transfer of treated biosolids from A Basin to a digester tank when piping disconnected from the outlet pipe into the digester tank.

Re: City of Danville – Sewer System Overflow Manhole # 29191

Dear Ms. Cathy Kibler:

The City of Danville had a sewer system overflow today at manhole #29191 that is located on the property of 2915 North Main St. This overflow occurred in the Fall Creek section, which is in the northeastern portion of the City of Danville. Estimated overflow was 800 gallons. Fall Creek does flow through this location and ends up flowing into the Dan River. The leak was reported at 10:00 AM and the leak was stopped at 10:15 AM. Public Works responded to the location and flushed the blockage from the line to stop the overflow. A sample was collected to be tested by the wastewater treatment facility.

This letter is being sent in accordance with our VPDES permit concerning sewer system overflows. Should you have any questions on this matter, please feel free to contact me.

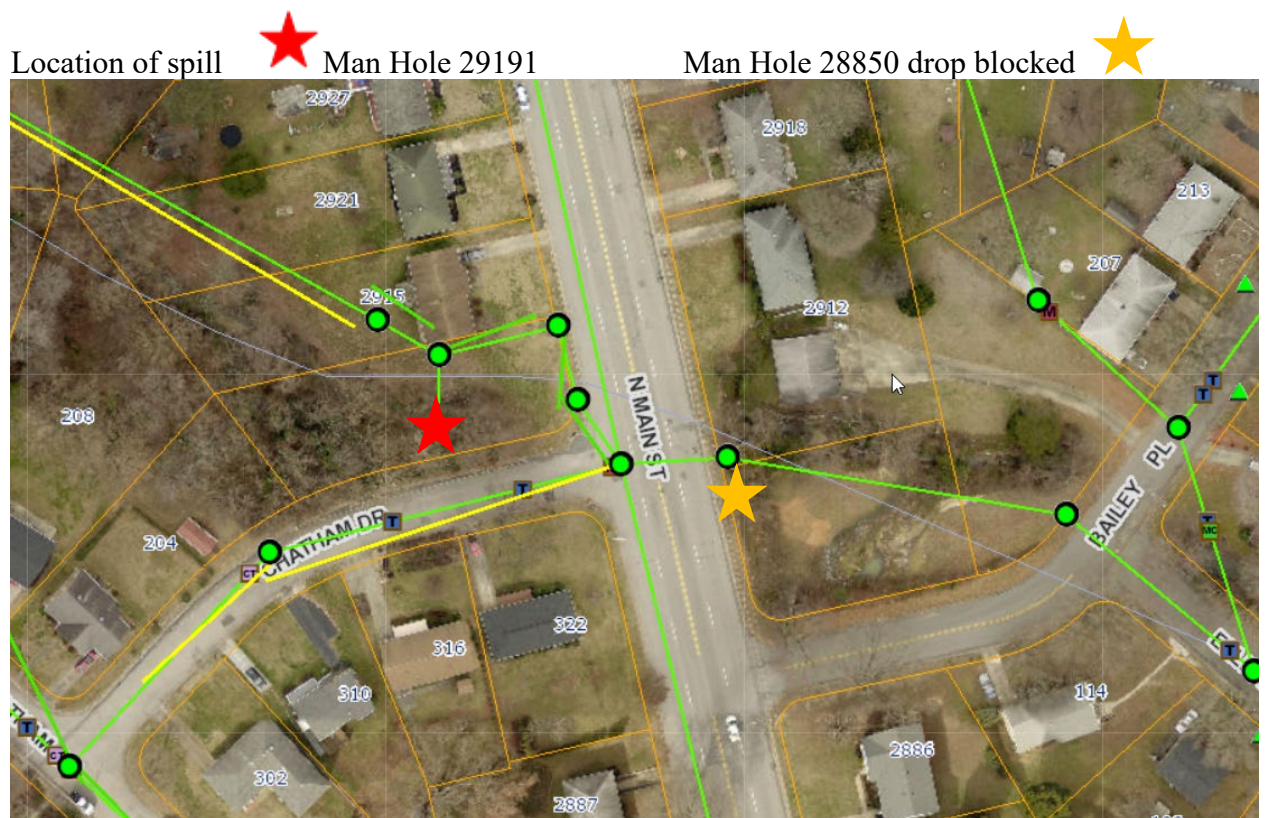

Sincerely,

Alan Johnson

Re: City of Danville – Sewer System Overflow between Manhole #'s 31688 & 31207

Dear Ms. Cathy Kibler:

The City of Danville had a sewer system overflow yesterday between manholes #31688 & #31207 that are located on the property of 114 Briarwood Dr. This overflow occurred in the section 15 Apple Branch, which is in the northeastern portion of the City of Danville. Estimated overflow was 400 gallons. A small creek does flow through this location and ends up flowing into the Dan River. The leak was reported at 11:30 AM and the leak was stopped at 12:30 PM. Public Works responded and utilized the flusher vehicle until a bypass could be set up to stop the overflow. A sample was collected to be tested by the wastewater treatment facility.

This letter is being sent in accordance with our VPDES permit concerning sewer system overflows. Should you have any questions on this matter, please feel free to contact me.

Re: City of Danville – Sewer System Overflow Airside pumping station

Dear Ms. Cathy Kibler:

The City of Danville had a sewer system overflow yesterday at Airside Pumping Station that is located in the eastern portion of the city of Danville, VA. Estimated overflow was 5,000 gallons. The Airside section of the sewer system does have storm drainage that flows to the Dan River. The leak was noticed at 08:30 AM and the was stopped at 09:00 AM. A private septic hauler was called in to the location and pumped down the dry pit area of the station. The power was restored to the outside breaker of the station that stopped the overflow. **No** sample was collected to be tested by the wastewater treatment facility as typically done under normal overflow situations. Maintenance staff did wash down the station area and applied lime to the affected areas at the station. Due to the excessive rainfall and high stream levels in the area, no adverse effects have been noted by the discharge.

This letter is being sent in accordance with our VPDES permit concerning sewer system overflows. Should you have any questions on this matter, please feel free to contact me.

Re: City of Danville – Sewer System Overflow in System 6 South Bank Interceptor

Dear Ms. Cathy Kibler:

The City of Danville had a sewer system overflow today near 1038 Monument St. that is located in the eastern portion of the city of Danville, VA. Manhole location was #12283. Estimated overflow was 1,000 gallons. This location is adjacent to the river and does have storm drainage that flows to the Dan River. The leak was reported at 1:10 PM and the was stopped at 03:15 PM. The cause of the overflow was a broken pipe. Public Works setup a bypass pumping equipment until the pipe can be repaired. A sample was collected at 02:45 to be tested by the wastewater treatment facility as typically done under normal overflow situations.

This letter is being sent in accordance with our VPDES permit concerning sewer system overflows. Should you have any questions on this matter, please feel free to contact me.

Re: City of Danville – Sewer System Overflow in Basin 21 58 West

Dear Ms. Cathy Kibler:

The City of Danville had a sewer system overflow yesterday near 435 Whittington Drive that is located in the western portion of the city of Danville, VA. Manhole location was #11090. Estimated overflow was 500 gallons. This location is adjacent to the river and does have storm drainage that flows to the Dan River. The leak was reported at 05:40 PM and the was stopped at 07:40 PM. The cause of the overflow was roots blocking flow in pipe. Public Works flushed the pipe until flow was restored. A sample was collected at 06:30 PM to be tested by the wastewater treatment facility as typically done under normal overflow situations. Sample was delivered to the Northside WWTP this morning.

This letter is being sent in accordance with our VPDES permit concerning sewer system overflows. Should you have any questions on this matter, please feel free to contact me.

Re: City of Danville – Sewer System Overflow Gilbert Drive pumping station

Dear Ms. Cathy Kibler:

The City of Danville had a sewer system overflow yesterday (06/22/23) at Gilbert Dr. Pumping Station that is located in the eastern portion of the city of Danville, VA. Estimated overflow was 4,000 gallons from the wet well and 1,000 gallons of that made it to the adjacent creek nearby. A higher-than-normal flow conditions into the station from heavy rainfall (I&I) in the system lead to the overflow. The Gilbert Dr. section of the sewer system does have storm drainage that flows to the Dan River. The high flow conditions were noticed to occur between 17:00 to 17:30 PM. Normal flow conditions resumed, and the overflow was stopped around 17:45 PM when the pumps were able to handle the flow conditions coming into that station. A private septic hauler was called in to the location and assisted with cleanup of the area around the station. **No** sample was collected to be tested by the wastewater treatment facility as typically done under normal overflow situations. Maintenance staff did wash down the station area and applied lime to the affected areas at the station. Due to the excessive rainfall and high stream levels in the area, no adverse effects have been noted by the discharge.

This letter is being sent in accordance with our VPDES permit concerning sewer system overflows. Should you have any questions on this matter, please feel free to contact me.

Sincerely,

Alan Johnson  
Director of Water & Wastewater Treatment

Re: City of Danville – Sewer System Overflow in North Bank Interceptor 2

Dear Ms. Cathy Kibler:

The City of Danville had a sewer system overflow Saturday June 24<sup>th</sup> at 2805 Riverside Drive that is located in the central portion of the city of Danville, VA. Manhole location was #21182. Estimated overflow was 100 gallons. This location is adjacent to the river and does have storm drainage that flows to the Dan River. The leak was reported at 06:55 PM and the was stopped at 08:00 PM. The cause of the overflow was grease from restaurant blocking flow in pipe. Public Works flushed the pipe until flow was restored. A sample was collected at 07:10 PM to be tested by the wastewater treatment facility as typically done under normal overflow situations. Sample has exceeded holding time and will not be processed.

This letter is being sent in accordance with our VPDES permit concerning sewer system overflows. Should you have any questions on this matter, please feel free to contact me.

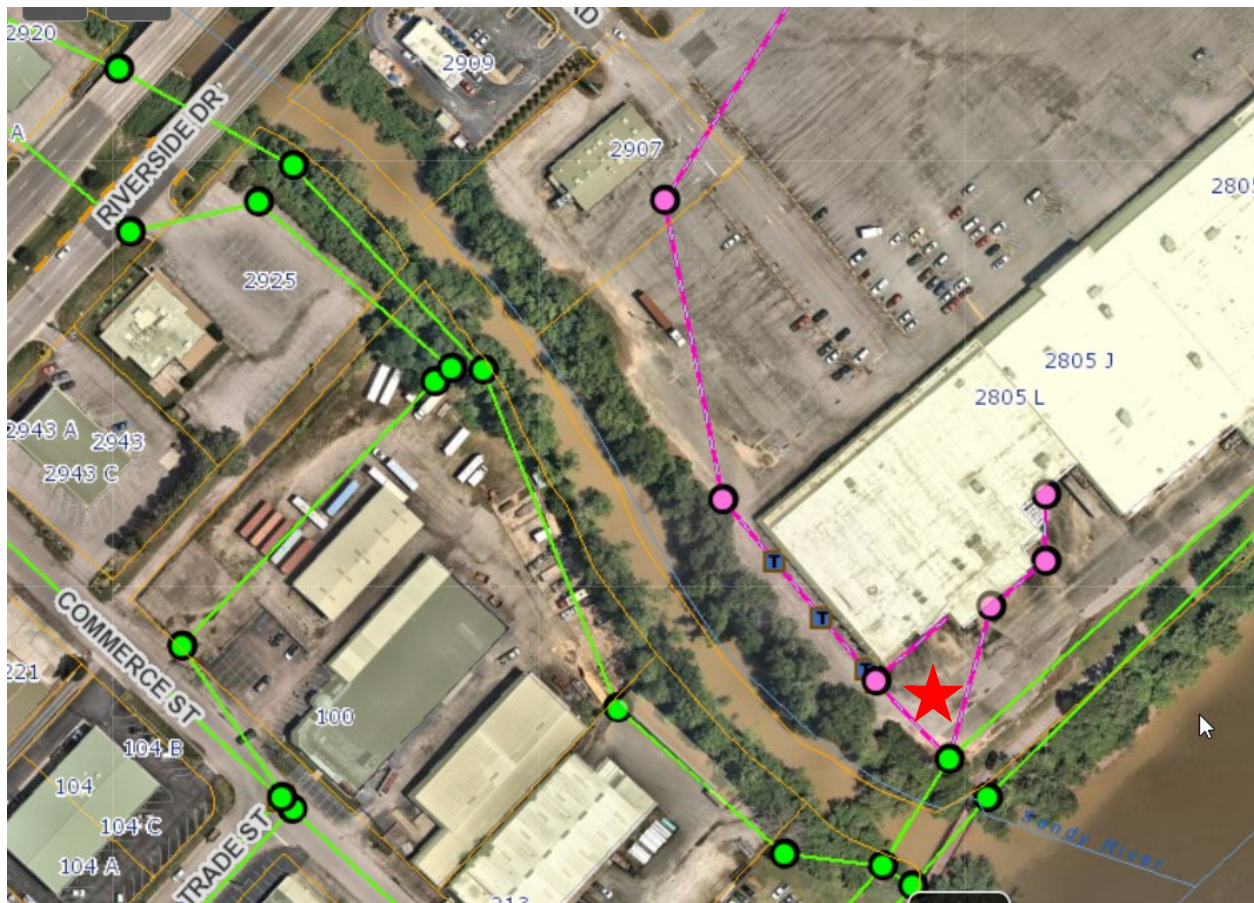

Sincerely,

Alan Johnson  
Director of Water & Wastewater Treatment

Re: City of Danville – Sewer System Overflow Airside Industrial Park

Dear Ms. Cathy Kibler:

The City of Danville had a sewer system leak on the force main serving the Airside system, Thursday July 28, 2022. The force main from the Airside pumping station developed a split which allowed about 2500 gallons of sewage out on to the surrounding area. The leak was reported around 7:50 AM and the leak was stopped at 08:20 AM that morning when the Airside pumping station was immediately turned off. Public Works set up a by-pass pump, along with an outside septic hauler was called in to perform pump and haul so that Buitoni Food Company would not have to be shut down. The spill did make it to Cane Creek, which eventually flows into the Dan River. Due to the urgency of the situation, a sample was not collected to be tested by the wastewater treatment facility.

This letter is being sent in accordance with our VPDES permit concerning sewer system overflows. Should you have any questions on this matter, please feel free to contact me.

Sincerely,

Alan Johnson  
Director of Water & Wastewater Treatment

Re: City of Danville – Sewer System Overflow Manhole # 20176

Dear Ms. Cathy Kibler:

The City of Danville had a sewer system overflow today at manhole #20176 on the line adjacent to Forestlawn Drive. This overflow occurred in the Fall Creek section, which is in the eastern portion of the City of Danville. Estimated overflow was 250 gallons. Fall Creek does flow near this location and ends up flowing into the Dan River. The leak was reported at 2:05 PM and the leak was stopped at 02:20 PM. Public Works responded to the location and flushed the blockage from the line to stop the overflow. A sample was collected to be tested by the wastewater treatment facility.

This letter is being sent in accordance with our VPDES permit concerning sewer system overflows. Should you have any questions on this matter, please feel free to contact me.

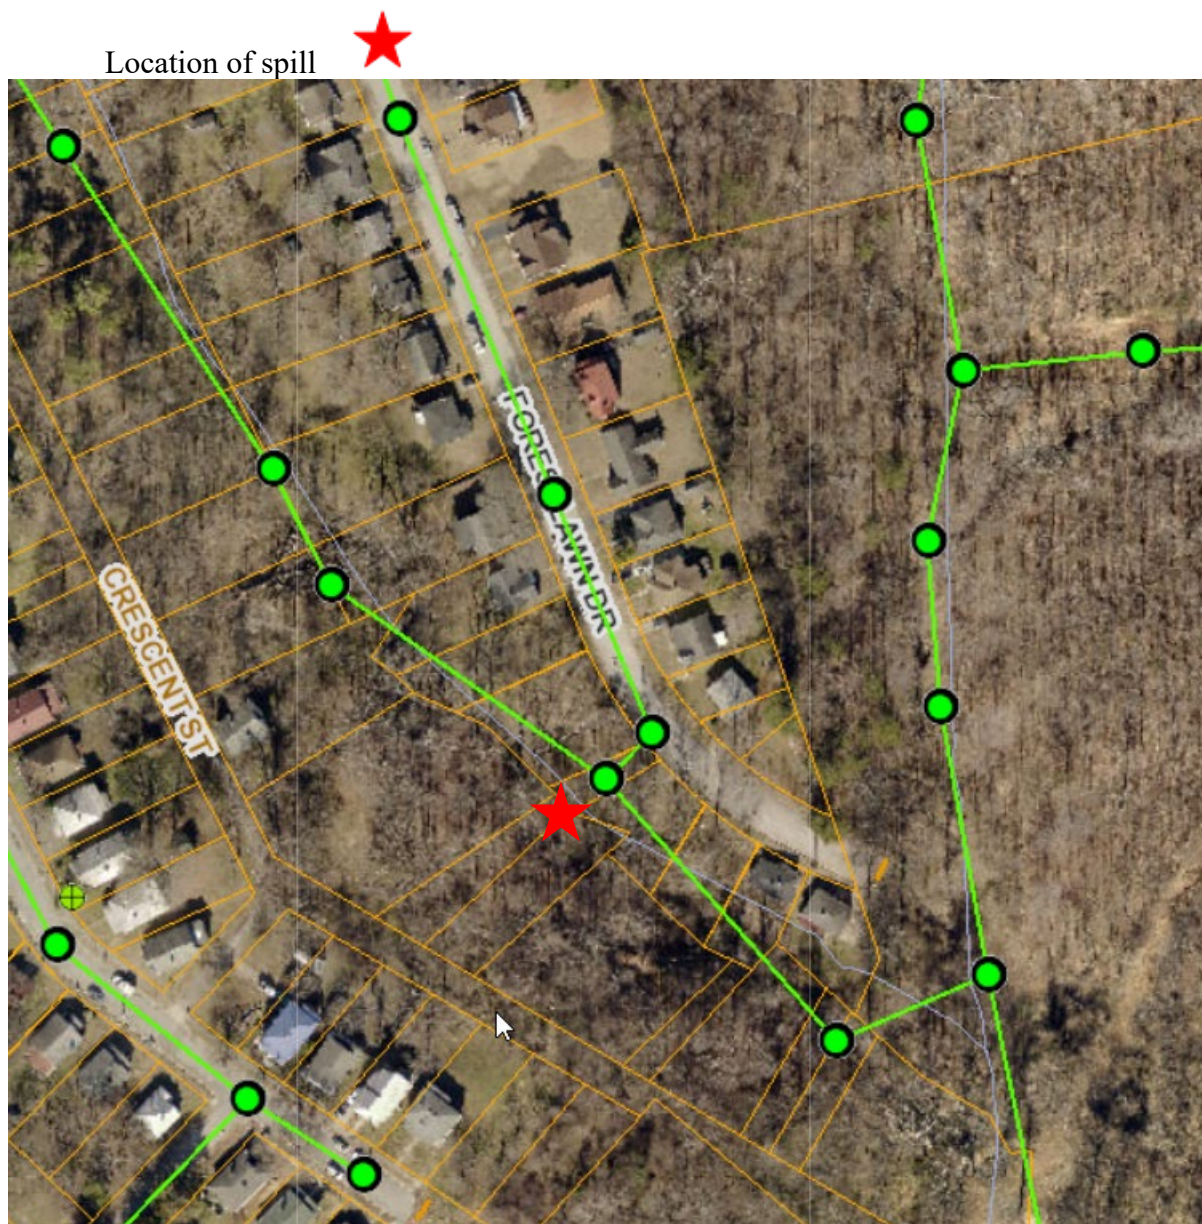

Sincerely,

Alan Johnson  
Director of Water & Wastewater Treatment

Re: City of Danville – Sewer System Overflow Airside Industrial Park

Dear Ms. Cathy Kibler:

The City of Danville had a sewer system leak on the force main serving the Airside System #1, Wednesday October 19, 2022. The air release valve on the force main from the Airside pumping station failed which allowed about 500 gallons of sewage out on to the surrounding area. The leak was reported around 4:45 PM and the leak was stopped at 05:30 PM that evening when the Airside pumping station was immediately turned off. Public Works utilized their vacuum truck to manage the flow until they replaced the broken air release valve. Due to the urgency of the situation, a sample was not collected to be tested by the wastewater treatment facility.

This letter is being sent in accordance with our VPDES permit concerning sewer system overflows. Should you have any questions on this matter, please feel free to contact me.

Sincerely,

Alan Johnson  
Director of Water & Wastewater Treatment

It is vital to manage water properly on site to protect our environment. If watercourses are polluted, or unacceptable wastes are disposed of to a sewer system, you or the company may end up in court. Industries using water from a river downstream of site may be affected by reduced water quality and sue if this causes damage. The site does not need to be next to a river to cause a problem. Any pollutants getting into a surface water drain or groundwater can end up in a river even if it is miles away. These pollutants can be traced back to source. Spillages can be easily noticed. A gallon of oil can completely cover a lake the size of two football pitches.

### **Why Protect Storm Water?**

Storm water flows to storm inlets which directly discharge untreated water to creeks and rivers. Storm water run-off picks up pollutants as it flows, therefore it is a main pollution source from land drainage. Pollutants include anything that is not storm water – petroleum products, chemicals, paint/wash, sediment, concrete dust/washout, excessive grass clippings, etc.

Increased pollutants in storm water can equate to:

- Less oxygen for aquatic life (fish and plants).
- Negative effects on terrestrial wildlife which depend on aquatic systems for survival.
- Increased flooding.
- Impaired recreational activities like hunting, fishing, swimming and boating.

### **SITE DRAINAGE**

There are generally two main types of drainage on site:

Surface water drains are designed to carry uncontaminated rainwater directly to a stream, river or soakaway. NOTHING should be allowed to enter surface water drains, except rainwater. Materials and waste should not be stored near drains. Even if described as bio-degradable, detergents are not suitable for discharge to surface water drains. Use of detergents should be carried out in designated areas draining to foul sewers.

Foul water drains are designed to carry foul water directly to a sewage works for treatment before being discharged into a watercourse.

It is an offence to cause or knowingly permit any poisonous, noxious or polluting matter or any solid waste matter (which includes cement, silt, concrete, oil, petroleum spirit, sewage or other polluting matter) to enter any controlled waters unless a consent to discharge is authorized by the relevant agency. Road drains and surface water gullies generally discharge into controlled waters and should be treated as such. DO NOT wash tools out in watercourses.

## **REFUELLING**

The risk of fuel spillage is greatest during refueling. Therefore, no refueling should take place in, over, or adjacent to watercourses. Refuel all machines (cars, trucks, mowers, weed-eaters, etc.) in a designated area at least 30 feet away from any watercourse.

## **SILT**

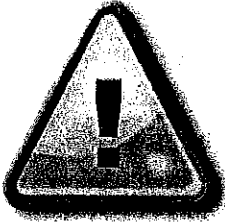

The most common form of water pollution from construction is suspended sediments-more commonly known as silt. Silt also carries other contaminants e.g., oil, and chemicals. Silt can be removed by:

- Settling out in a settlement tank.
- Allowing it to infiltrate through a large grassy area (check with the landowner/environmental agency).
- Chemical treatment with flocculants/sedimentation.
- Pumping to a foul sewer (permission of the sewage undertaker is required)
- Pump into a tanker and dispose off site.

## **Protecting Storm Water**

Storm water protection can be accomplished with proper waste disposal, safe material storage, and quick spill response. Best Management Practices can reduce the number of pollutants that reach waterways:

- Obtain the proper stormwater permits and develop Storm Water Pollution Prevention Plans
- (SWPPPs) if a construction project is greater than or equal to an acre.
- If a liquid is not rainfall, snow or ice melt, do not put it in a storm drain.
- Clean all yard equipment and concrete tools away from storm drains.
- Protect storm drains from dewatering sediment.
- Rinse latex paint brushes and mop buckets in sanitary drains (not storm).
- Store liquids away from drains, inside, under cover, and on spill pallets.
- Have stabilized construction site entrances and remove tracked roadway sediment before rain and by the end of the day.
- Have oil dry and drain protection pads/booms nearby to stop spills from reaching drains.
